questions about using this tool.

Reporting Specifications
This field will be prepopulated for all rows of data based on the selection made in the drop-down from 'Select your jurisdiction' from the Start Here tab. The cells will appear gray to indicate that no additional data entry is needed.
This field will be prepopulated for all rows of data based on the selection made in the drop-down for 'Select reporting period' from the Start Here tab (See technical guidance for reporting timeline table.) The cells will appear gray to indicate that no additional data entry is needed.
This is a formula field that will generate a total count of health equity focused overdose prevention activities that occurred in a clinical, harm reduction, public safety, or other settings during the designated reporting period once the disaggregates below are entered into the appropriate fields.

Enter a whole number for the health equity focused overdose prevention activities that occurred in a health/clinical setting.
Enter a whole number for the health equity focused overdose prevention activities that occurred in a harm reduction setting.
Enter a whole number for the health equity focused overdose prevention activities that occurred in a public safety setting.
This disaggregate is optional. If chosen, enter a whole number that reflects the health equity focused overdose prevention activities that occurred in any setting outside of clinical, harm reduction, and public safety.
Enter a total count of harm reduction service encounters (e.g., in-person, mail, telephone, online) that occurred at an OD2A-S funded or supported organization during the designated reporting period.
Enter a whole number for service encounters where in-person drug checking occurred.
Enter the five-digit zip code for each site where harm reduction services (e.g., in-person, mail, telephone, online) were provided. For any service site where services are provided in person, use the brick and mortar location zip code. For services provided via phone or mail, use the address of the brick and mortar location. For mobile-based outreach services, use the zip code of outreach. For any service sites where zip codes are unknown, provide the total number of encounters that occurred across locations with unknown zip codes in the designated cell for “unknown” within the adjacent cell.
Enter a whole number for service encounters involving drug checking for each zip code provided. When the zip code is "unknown" total the remaining encounters with drug checking and enter a whole number.
Enter a whole number for pre-measured doses of naloxone distributed by an OD2A-S funded or supported organization during the designated reporting period.
This variable has been pre-selected. If data are not available for a particular type of organization, enter 0 for all variables in the adjacent row.
Enter a whole number for the count of all pre-measured naloxone doses distributed for each type of organization.

Enter the five-digit zip code where the funded organization distributed their doses of naloxone. For any distribution site where the zip code is unknown, provide the total in the adjacent cell.
Enter a whole number for the count of pre-measured naloxone doses distributed for each zip code. When the zip code is "unknown" total the remaining doses distributed and enter a whole number.
Enter a total count of unique navigators who link PWUD to care and/or harm reduction services via warm handoffs during the designated reporting period.
Enter a whole number for the navigators located in a health/clinical setting.
Enter a whole number for the located in a harm reduction setting.
Enter a whole number for the navigators located in a public safety setting.
Enter a whole number for the in any other settings.
This disaggregate is optional. If chosen, enter a whole number for the total hours navigators have spent on linkage to care or referral efforts in health/clinical settings.
This disaggregate is optional. If chosen, enter a whole number for the total hours navigators have spent on linkage to care or referral efforts in harm reduction settings.
This disaggregate is optional. If chosen, enter a whole number for the total hours navigators have spent on linkage to care or referral efforts in public safety settings.
This disaggregate is optional. If chosen, enter a whole number for the total hours navigators have spent on linkage to care or referral efforts in any other settings.
This is a formula field that will generate a total count of unique referrals to care and harm reduction services once the disaggregates below are entered in the appropriate fields.
This variable has been pre-selected. If data are not available for a particular race and ethnicity, enter 0 for all variables in the adjacent row. Note: when the race_ethnicity is marked unknown, this also includes if an individual preferred not to answer.
Enter a whole number for all referrals to MOUD for each race/ethnicity with available data.

Enter a whole number for all referrals to behavioral health treatment only (without MOUD) for each race/ethnicity with available data.
Enter a whole number for all referrals to harm reduction services for each race/ethnicity with available data.
This is a formula field that will generate a total count for all referrals to MOUD, behavioral treatment only (without MOUD), and harm reduction services by each race/ethnicity.
Enter a whole number for the count of all unique clinicians trained on implementing the 2022 CDC Clinical Practice Guidelines for Prescribing Opioids for Pain during the designated reporting period.
Optional disaggregate: If chosen, select a specialty from the dropdown list for the type of clinicians trained on the 2022 CDC Clinical Practice Guidelines for Prescribing Opioids for Pain.
Optional disaggregate: If chosen, enter a whole number for the unique clinicians by specialty who are trained on implementing the 2022 CDC Clinical Practice Guidelines for Prescribing Opioids for Pain.
Optional disaggregate: If chosen, enter a whole number for all eligible clinicians who could be trained on implementing the 2022 CDC Clinical Practice Guidelines for Prescribing Opioids for Pain.
This is a formula field that will generate a percentage of clinicians trained when the numerator (Num_Trained) and denominator (Num_Eligible) are entered into the appropriate fields.
Enter the total count of health/clinical settings where protocols and/or policies have been implemented/improved for evidence-based SUD treatment and/or referrals. Note this will be the number of unique health settings, regardless of whether they have just one or both types of protocols/policies.
Enter a whole number for the health/clinical settings where protocols or policies have been implemented/improved for evidence-based SUD treatment.
Enter a whole number for the health/clinical settings where protocols or policies have been implemented/improved for evidence-based SUD referrals.

f information as 35 hours annually per response from each recipient, including the time for reviewing
d maintaining the data/information needed, and completing and reviewing the collection of information. An
spond to a collection of information unless it displays a currently valid OMB control number. Send comments
information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review

r of harm reduction service encounters at OD2A funded or supported organizations

y Instructions

Encounters: Enter a total count of harm reduction service encounters (e.g., in-person, mail, telephone, online) that occurred at an OD2A-S funded or supported organization during the designated reporting period.
s_with_Drug_Checking: Enter a whole number for service encounters where in-person drug checking occurred.
y_HR_Service _Site: Enter the five-digit zip code for each site where harm reduction services (e.g., in-person, mail, telephone, online) were provided. For any service site where services are provided in person, use the brick and mortar location zip code. For services provided via phone or mail, use the address of the brick and ation. For mobile-based outreach services, use the zip code of outreach. For any service sites where zip codes are unknown, provide the total number of encounters that occurred across locations with unknown zip codes in the designated cell for "unknown" within the adjacent cell.
s_with_Drug_Checking_by_ZipCode: Enter a whole number for service encounters involving drug checking for each zip code provided. When the zip code is "unknown" total the remaining encounters with drug checking and enter a whole number.

e that CDC is requesting that jurisdictions enter all counts—**please do not suppress small numbers.** If the count is zero, **please enter "0"**—please do not leave these cells null or blank to ensure these cells are not mischaracterized as missing data.
