General Comment

this fellowship program should be shut down and defunded. i amnot in favor of any program of the cdc. the cdc has shown itefl to be a rogue agency not responding to the american peoplie at all. its lockdown has created economic chaos in the world.it is focused on money for its participants and they all could care less about health for american people. it is a group of selfish employiyees who are overpaid and producing nothing of value for america. i am opposed totally to this program being funded. we need yto bring fauci and wolensky and birx up on charges.the cdc program took jobs away from the common people in america who refused to use their bodies as a pincushiion for experimental products. we all know big pharma is a congame where they give us drugs that kill us for big money and then take thge drugs off the market when they have killed enough people to show they dont work at all. this back and forth between cdc and bigp harma where the guys involved get big money from selling out america is wrong. it isnt working. its shown to be criminal imo. shut it down
