

Marburg symptom monitoring following airport screening

Daily Group

Text Messages: 2024 Marburg Virus Outbreak

Distribution Timeline (starting noon ET)	Message from US Public Health	Process steps
(Day 0) Upon enrollment Sent at noon	<p>US Public Health: Welcome! You are receiving this message because you recently arrived in the US from Rwanda, where there is a Marburg outbreak.</p> <p>For English, reply “1” For Kinyarwanda, reply “2”</p>	If no reply, messages continue in English
As soon as possible after enrollment message	<p>Watch for these Marburg symptoms until 21 days AFTER you left Rwanda: fever, chills, headache, muscle aches, rash, chest pain, sore throat, nausea, vomiting, diarrhea. Bleeding or bruising (not caused by an injury) can appear later in the illness.</p> <p>If you get sick with any of these symptoms, separate yourself from others immediately and call the health department in your area for advice BEFORE going to a healthcare facility. If you can’t reach your health department, call a doctor. Tell them that you were recently in an area with a Marburg outbreak.</p> <p>Visit https://www.cdc.gov/marburgtravel for more information. Visit https://www.cste.org/page/EpiOnCall to notify the health department.</p>	
As soon as possible after “Watch for these symptoms”	Based on the information you provided during public health entry screening at the airport, we will ask you about your health status by text message every day until 21 days after you were last in a hospital where Marburg virus was spreading. Please reply to these messages. If you do not reply, a public health worker will contact you.	
Daily	<p>This is your [daily] public health check-in. If you do not reply, a public health worker will contact you.</p> <p>[Daily:] In the past day,</p>	If no reply, resend message in one hour.

Public reporting burden of this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC, Reports Clearance Officer, 1600 Clifton Rd., MS H21-8, Atlanta, GA 30333, ATTN: PRA (0920-XXXX).

	<p>have you had a fever (100.4° F / 38° C or higher) or felt feverish, had chills, new or unusual headache or muscle aches, rash, chest pain, sore throat, nausea, vomiting, or diarrhea? If yes, reply "1" If no, reply "2"</p>	<p>If no final reply, then health department of jurisdiction will get a daily list of nonresponses.</p>
<p>If 2 (no), traveler will receive this message</p>	<p>Thank you for your response. We will check in with you again [tomorrow].</p>	
<p>If 1 (yes), traveler will receive this location message plus additional symptom questions below.</p>	<p>Since you indicated that you have symptoms, please separate yourself from others (isolate). Click this link to provide additional information. [LINK - Attachment C3 - 2024 Marburg Symptom Monitoring Web Survey] A public health worker will be in touch shortly to discuss your symptoms and provide recommendations.</p>	
<p>21 days after the day they were last in the HCF with transmission risk.</p>	<p>US Public Health: That was your final public health check-in. Today is your last day of receiving text messages for health monitoring for Marburg symptoms. If you left Rwanda less than 21 days ago, please continue to watch your health until 21 days after you left Rwanda. Thank you for doing your part to protect yourself and your community.</p> <p>Visit https://www.cdc.gov/marburgtravel for more information.</p>
