Description & Funding

Description

Priority: Standard

Date Needed: 06/17/2024

Priority Justification:

CDC Priority Area for this Project: Not selected

Determination Start Date: 06/05/24

Description:

This is an Office of Management and Budget (OMB) package for the Injury Control Research Centers (ICRCs) annual progress reports (APRs) and success stories template. Successful clearance of the OMB package will allow the ICRC unit to collect valuable data that will be used to monitor the performance of 11 grantees funded under Grants for Injury Control Research Centers (CDC-RFA-CE24-001). APR data, publications, and success stories will be collected via the web-based Cooperative Agreement Management Platform (CAMP). The documents in this OMB package are: 1) The OMB Supporting Statement (SS) A form provides a justification for the OMB package, including information about why the information data collection is necessary and how improved information technology is used to reduce grantee burden. 2) The OMB Supporting Statement B form elaborates on important details for collections of information employing statistical methods. 3) Attachment 1: Authorizing Legislation, Section 301 of the Public Health Service Act, which authorizes information collection as a means for states to advance public health across the lifespan and reduce health disparities. 4) Attachment 2: List of Grantees is a placeholder document for the grantee list that will accompany the 30-day OMB package. 5) Attachment 3. ICRC CAMP Screenshots provides 8 screenshots of the ICRC APR on CAMP. 6) Attachment 4: Crosswalk of ICRC Program Evaluation Questions and Indicators helps to explain how the evaluation questions map onto the ICRC indicators. 7) Attachment 5a: ICRC APR is the primary document for this information collection. Grantees will complete the APR annually, as required by their grant. The APR is divided into 4 sections: research, outreach, training and education, and the publication table. 8) Attachment 5b: Publication Table is a part of the APR, but grantees will download it as an Excel sheet, re-upload, and submit via CAMP. 9) Attachment 5c: Success Stories Template is not a part of the APR but will be housed on CAMP for grantees to submit successful research, outreach, and training activities that they would like to share with CDC and have displayed on the CDC website. 10) Attachment 6: APR guidance provides grantees with helpful information as they fill out their APR. It includes information about what to include in each section of the APR, what to include when describing accomplishments, etc. Additionally, the SSA and SSB documents reference attachments 7 (Federal Register Notice), 8 (NCIPC-CIO Privacy Act applicability), and 9 (NCIPC Research Determination). These documents will be finalized while the 60-day OMB

package clears and are not included in the current project determination package, although placeholder language to be cleared is in the documents.

IMS/CIO/Epi-Aid/Lab-Aid/Chemical Exposure Submission: No

IMS Activation Name: Not selected

Submitted through IMS Clearance Matrix: Not selected

Primary Scientific Priority: Not selected

Secondary Scientific Priority (s): Not selected

Task Force Responsible: Not selected

CIO Emergency Response Name: Not selected

Epi-Aid Name: Not selected

Lab-Aid Name: Not selected

Assessment of Chemical Exposure Name: Not selected

Goals/Purpose

The goal of this project determination is to get OMB clearance for the ICRC APR and related guidance, as well as the Success Stories template. The 11 new grantees for the ICRC 2024 funding cycle will begin funding on August 1, 2024. We hope to receive approval from OMB in early 2025 so we can finalize the APR on CAMP. We will open the ICRC APR for data collection of year 1 progress reports on CAMP on July 1, 2025. The year 1 APR will close on October 31, 2025.

Objective:

The objectives of this project are to submit and clear an OMB package for 1) an APR 2) a Publication Table, and 3) their associated guidance, and for 4) a Success Stories Template for CDC-RFA-CE24-001 grantees.

Does your project measure health disparities among populations/groups experiencing social, economic, geographic, and/or environmental disadvantages?: No

Does your project investigate underlying contributors to health inequities among populations /groups experiencing social, economic, geographic, and/or environmental disadvantages?: Yes

Does your project propose, implement, or evaluate an action to move towards eliminating health inequities?: No

Activities or Tasks: Secondary Data or Specimen Analysis

Target Populations to be Included/Represented: No Human Population

Tags/Keywords:

Program Evaluation ; Office of Management and Budget (OMB) package ; Injury Control Research Centers (ICRC) ; Annual Progress Report ; performance monitoring ; Cooperative Agreement Management Platform (CAMP) ; improved information technology ; burden reduction ; timely response

Activity originated and designed by CDC staff, or conducted at the specific request of CDC, or CDC staff will approve study design

CDC's Role: and data collection as a condition of any funding provided

Method Categories: Survey

Methods: For this OMB package, the documents will be sent to the National Center for Injury Prevention and Control (NCIPC) OMB team on May 20th, 2024 to submit for 60-day review. While the package is open for 60-day review, we will continue to refine the package with the NCIPC OMB team. Also on May 20th, 2024, the package will be submitted for to check for Privacy Act related review. Once we receive comments from the 60-day, we will revise and reassemble the packaging, including attachments 7 (Federal Register Notice), 8 (NCIPC-CIO Privacy Act applicability), and 9 (NCIPC Research Determination), and submit for 30-day review. OMB approval will be for 3 years, so we will need to renew the package in the middle of our grant cycle, so that it will cover the last few APRs. ICRC grantees will report progress and activity information to CDC on an annual schedule using a web-based CAMP. As necessary, grantees will also submit Success Stories. Data collection will include 100% of ICRC grantees; therefore no subpopulation will be studied and sampling methods will not be used. No research design or human subjects will be involved. CDC will not use statistical methods for analyzing information. Most data will be qualitative and therefore will include case and Success Story descriptions. In certain limited cases, count data is collected (e.g., number of trainees, number of publications, etc.); however, most of these data are used to better understand ICRC productivity and activities. Furthermore, the information in the APR and Publication templates will allow for CDC staff to monitor program activities and implementation and provide technical assistance to grantees after an internal qualitative review has been completed.

Collection of Info, Data or Biospecimen: APR and Success Stories data will be collected via CAMP. This data is self-reported by ICRC grantees as part of their funding requirements. Collecting this APR data with an electronic template on CAMP allows CDC to quickly generate a variety of routine and customizable reports that describe activities about individual and across all funded ICRCs.

Expected Use of Findings/Results and their impact: CDC will use OMB clearance to collect APR data and Success Stories from 11 grantees. CDC will use the APR data and Success Stories to monitor program goals, identify grantee technical assistance needs, and to respond to inquiries from the HHS, the White House, Congress and other stakeholders about ICRC program activities and their impact on public health. The grantee Success Stories are particularly helpful for CDC to succinctly showcase the valuable work of ICRCs. These functions are central to the NCIPC's broad mission of protecting Americans from violence and injury threats. The information collection will allow CDC to monitor the increased emphasis on strategies that affect health outcomes and impact, and is expected to reduce duplication of effort, enhance program impact, and maximize the use of federal funds.

Could Individuals potentially be identified based on Information Collected? No

Data

DMP

Proposed Data Collection Start Date: 7/1/25

Proposed Data Collection End Date: 10/31/25

Proposed Public Access Level: Public

Public Access Justification: These data are collected with federal appropriations and will be used to develop publicly available documents (such as Success Stories, a Program Impact Report, etc.). Thus, data will be made available to anyone who requests it. However, some of the intellectual property or copyright restrictions may apply.

How Access Will Be Provided for Data: The data will be provided upon request.

Plans for Archival and Long Term Preservation: APR data will be stored on NCIPCs Data Lake. A PDF version of the APR data will be stored in the grantee file on GrantSolutions.
