

requested ITP. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue the requested ITP to the applicant.

Request for Public Comments

The Service invites comments and suggestions from all interested parties on the proposed HCP and screening form during a 30-day public comment period (see **DATES**). In particular, information and comments regarding the following topics are requested:

1. Whether the adaptive management, monitoring, and mitigation provisions in the proposed HCP are sufficient;
2. The requested 6-year ITP term;
3. Any threats to the covered bat species that may influence their populations over the life of the ITP that are not addressed in the proposed HCP or screening form;
4. Any new information on white-nose syndrome effects on covered bat species;
5. Whether or not the significance of the impact on various aspects of the human environment has been adequately analyzed; and
6. Any other information pertinent to evaluating the effects of the proposed action on the human environment.

Availability of Public Comments

You may submit comments by one of the methods shown under **ADDRESSES**. We will post on <https://regulations.gov> all public comments and information received electronically or via hardcopy. All comments received, including names and addresses, will become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1539) and its implementing regulations (50 CFR 17.22) and NEPA (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1500–1508; 43 CFR part 46).

Karen Herrington,

Acting Assistant Regional Director, Ecological Services.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX.24.DJ73.V3410.00; OMB Control Number 1028–NEW]

Vulnerability to Water Insecurity, Hazards Planning and Response

AGENCY: U.S. Geological Survey, Department of Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the U.S. Geological Survey (USGS) is proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before May 31, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Send your comments on this information collection request (ICR) by mail to U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive, MS 159, Reston, VA 20192; or by email to gs-info_collections@usgs.gov. Please reference OMB Control Number 1028–NEW—Water Insecurity in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this Information Collection Request (ICR), contact Jennifer Rapp by email at jrapp@usgs.gov, or by telephone at 804–261–2635. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>. Individuals who are hearing or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: In accordance with the PRA (44 U.S.C.

3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public’s reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on September 2, 2022 (87 FR 54240). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: The United States is facing growing challenges related to the availability and quality of water due to shifting demographics, aging water delivery infrastructure, the impacts of climate change, and increasing hazards risk, like floods and drought. Working with incomplete knowledge, managers must consider the needs of various

demographic groups and economic sectors when making management decisions as well as when responding to emergencies. To improve delivery of effective science to support decision-making, the USGS must adapt to meet the evolving needs of stakeholders in the water hazard space. We will collect information regarding the decision-making process, data, and data format needs to support daily, long-term, and emergency management decision-making. Information will also be sought on gaps in data delivery and coverage. A lack of decision-support data within water institutions can lead to poor decision-making and outcomes that produce conflict between water use sectors, states, or communities and ultimately may lead to crisis. This information will support the delivery of appropriate data, in appropriate formats, at the right time for decision-making and emergency management. The information will guide USGS support of water resource institutions, enhancing resilience in the face of the many water-resources challenges the Nation currently faces.

Title of Collection: Vulnerability to Water Insecurity, Hazards Planning and Response.

OMB Control Number: 1028–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: state, Tribal nation, and local water resource managers and water resource stakeholders; water hazard responders; and members of the public that engage in use of water data as part of their job (i.e., academics or non-governmental organizations).

Total Estimated Number of Annual Respondents: 750.

Total Estimated Number of Annual Responses: 750.

Estimated Completion Time per Response: 60 minutes.

Total Estimated Number of Annual Burden Hours: 750.

Respondent's Obligation: Voluntary.

Frequency of Collection: Once per year.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor, nor is a person is required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Joseph Nielsen,

Director, Integrated Information Dissemination Division, Water Resources Mission Area.

BILLING CODE P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0037834; PPWOCRADNO–PCU00RP14.R50000]

Notice of Inventory Completion: University of California, Riverside, Riverside, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California, Riverside has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Megan Murphy, University of California, Riverside, 900 University Avenue, Riverside, CA 92517–5900, telephone (951) 827–6349, email megan.murphy@ucr.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of California, Riverside, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. The two associated funerary objects are charcoal samples. From December 1984 through January 1985 the University of California, Riverside Archaeological Research Unit (UCR–ARU) investigated archaeological site

CA–RIV–1806 (Hi Card Ranch) as part of an environmental impact assessment related to a housing development near Wildomar. Daniel McCarthy, staff archaeologist for the UCR–ARU published a report on the excavation in 1986 entitled “Excavations at Hi Card Ranch (CA–RIV–1806), Santa Rosa Plateau, Near Wildomar, Riverside County, California”. A total of 26 units, including four test units were excavated. Items removed from the site included cremated human remains and charcoal, as well as faunal bone, a bead made from faunal bone, seeds, stone tools and flakes, ground stones, modified disc-shaped and donut-shaped stones, and projectile points. The human bone removed from the site was not identified as human until a morphological laboratory analysis following excavation. Five small human bone fragments were all uncovered in unit 6, which was located on the northwestern edge of the excavation in what archaeologists believed was a single cremation. The associated archaeological collection was temporarily housed in the University of California Riverside Archaeological Curation Unit under Accession #101. The cremated human bone fragments and charcoal listed in this inventory were sent to the UCR Radiocarbon Laboratory under the direction of Dr. Taylor to be dated and remained in the UCR collection after testing. The remainder of the collection was returned to the landowner, Mr. Keith Card, in October of 1989. UCR NAGPRA Program Staff contacted the family and colleagues of the late Keith Card, but were unable to locate the other artifacts removed from the site.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The University of California, Riverside has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The two objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in
