SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. 3501 et seq., chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, USCG-2024-0734, and must be received by January 8, 2025.

Information Collection Request

Title: National Recreational Boating Safety Survey.

OMB Control Number: 1625-0089.

Summary: The National Recreational Boating Safety Survey collects data on recreational boating participation and exposure. Specifically, the survey focuses on the types of boats used, the demographics of boaters, the types of safety equipment on recreational boats, and the amount of time boaters spend on the water. Boating hours calculated from this survey play an integral part in calculating risk ratios associated with recreational boating. In light of the USCG's safety-oriented mission, we are proposing a name change of this survey to the National Recreational Boating Safety Survey from the National Recreational Boating Survey.

Need: The Federal Boat Safety Act of 1971 determines the framework of the Coast Guard recreational boating safety program. This program as set forth in 46 U.S.C., Chapter 131, requires the Coast Guard to ``encourage greater State participation and uniformity in boating safety efforts, and particularly to permit the States to assume a greater share of boating safety education, assistance, and enforcement activities.'' See 46 U.S.C. 13102. The Coast Guard Office of Auxiliary & Boating Safety, Boating Safety Division achieves these goals by providing timely and relevant information on boating activities that occur in each respective jurisdiction. The boating information provided by the Coast Guard enables each State agency to tailor and implement safety initiatives addressing specific needs of boaters in local jurisdictions. The primary objective of this collection is to provide the Coast Guard with the required information in a format suitable to effectively manage the program.

Forms: None.

Respondents: Recreational boaters and recreational boat owners living in the 50 states and the District of Columbia.

Frequency: The survey takes place every five to eight years and the last survey was conducted in 2018.

Hour Burden Estimate: The survey will take approximately 125,863 respondents a total estimate burden of 15,151 hours.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. et seq., chapter 35, as amended.

Dated: November 19, 2024.

Kathleen Claffie,
Chief, Office of Privacy Management, U.S. Coast Guard.
