Kindergarten Teacher Survey (Child Level)
Spring 2024 - Form TQCSK**

INTRODUCTION

Dear Teacher,

Your school has agreed to participate in the **Early Childhood Longitudinal Study, Kindergarten Class of 2023-24 (ECLS-K:2024)**, a nationwide study of elementary-aged children and their schools, teachers, and parents. As part of the study, we are asking teachers at your school to complete surveys. You have been asked to complete this survey because one or more of the children in your class(es) are participants in this study. The child who is the subject of this survey is identified on the cover. This survey contains questions about this child's skills and abilities.

The ECLS-K:2024 collects information from teachers of children who are in the study to investigate the relationship between children's academic progress and various school, classroom, teacher, and home characteristics.

Taking part in the study is voluntary. You may stop at any time or choose not to answer a question you do not want to answer. However, only you can provide this information. Although we realize you are very busy, we urge you to complete this survey as completely and accurately as possible.

THANK YOU VERY MUCH FOR YOUR HELP.

MARKING DIRECTIONS

PLEASE READ CAREFULLY AND USE A BLACK OR BLUE BALL POINT PEN TO COMPLETE THIS SURVEY. DO NOT USE PENCIL OR FELT-TIP PEN.

MARKING BOXES

It is important that you mark an "X" in the box next to your answers and print clearly.

Shown below is the correct way to mark your answers, along with examples of incorrect ways.

Correct Mark:

Incorrect Marks:

Light and thin, outside the box, thick or scrawled.

How to Change an Answer:

Completely black out the box of the incorrect answer and mark an "X" in the box next to the correct answer.

PRINTING ANSWERS IN BOXES:

Answers should be printed clearly and should not touch or cross any of the box lines. Do not cross zeroes or sevens. That is, do not write a zero with a line through it like this – 0̄, and do not write a seven with a line through it like this – 7̄.

Write one number per box like this:

1	2	3	4	5	6	7	8	9	0
---	---	---	---	---	---	---	---	---	---

Write words like this:

John Smith

ACADEMIC RATING SCALE

Please rate this child's current skills, knowledge, and behaviors within language and literacy (section 1), science (section 2), and mathematical thinking (section 3), based on your experience with him or her. If you are not the primary teacher in any of these areas, you may want to consult with the person most familiar with the child's progress in the area when completing the scales.

- This is NOT a test and should NOT be administered directly to the child.
- Each skill, knowledge, or behavior is listed in bold, and there are often examples to help illustrate what is intended. **These examples do not exhaust all the ways the child may demonstrate what he or she knows or can do.** Use the examples as a guide to the level of proficiency a child should have reached in order to receive the highest rating.

For each question, **please rate this child compared to other children of the same age level** using the following **five-point scale** that reflects the degree to which a child has acquired and demonstrated the identified skills, knowledge, and behaviors.

Not yet	=	Child <u>has not yet</u> demonstrated skill, knowledge, or behavior.
Beginning	=	Child is <u>just beginning</u> to demonstrate skill, knowledge, or behavior but does so very inconsistently.
In progress	=	Child demonstrates skill, knowledge, or behavior <u>with some regularity</u> but varies in level of competence.
Intermediate	=	Child demonstrates skill, knowledge, or behavior <u>with increasing regularity and average competence</u> but is not completely proficient.
Proficient	=	Child demonstrates skill, knowledge, or behavior <u>competently and consistently</u> .
Not applicable or Skill not yet taught	=	Skill, knowledge, or behavior <u>has not been introduced</u> in classroom setting.

If this child has limited English proficiency or is an English language learner, answer with his or her native language in mind if he or she does not yet demonstrate skills in English but does demonstrate them in his or her native language.

If this child has a disability, it may be necessary to consider adaptations for some questions to make them more inclusive for this child's skills and/or use of adaptive equipment. Some children may utilize alternative forms of verbal communication (for example, sign language, communication boards) or written communication (for example, word processors, Braille, dictation). Please answer the questions with these adaptations in mind.

i. Demonstrates early writing behaviors – for example, by using initial consonants to spell words ("d" for the word "dog"), or using letter names to represent sounds ("r" for the word "are"), or phonetic spelling ("hrt") for the word "heart," to convey words or ideas.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

a. Counts forward beginning from a given number within the known sequence, instead of having to begin at 1 – for example, child starts with 5 objects and is given 2 more and child counts “6, 7” instead of “1, 2, 3, 4, 5, 6, 7” to get the answer of 7.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Orders a group of objects – for example, by ordering rods or sticks by length, or arranging paints from lightest to darkest or musical instruments from softest to loudest.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Shows an understanding of the relationship between quantities – for example, knows that a group of ten small stones is the same quantity as a group of ten larger blocks.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Demonstrates consistent understanding of one-to-one correspondence – for example, when counting objects, says the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. For any number from 1 to 9, finds the number that makes 10 when added to the given number (for example, by using objects or drawings) and records the answer with a drawing or equation (for example, $3 + _ = 10$ and $4 + _ = 10$).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Uses place value to compose and decompose numbers from 11 to 19 into tens and ones (for example, by using objects or drawings) and records each composition or decomposition by a drawing or equation (for example, $18 = 10 + 8$).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Solves problems involving numbers using concrete objects – for example, “Vera has six blocks, George has three, how many blocks are there in all?” or “How many do I need to give George so he will have the same number of blocks as Vera?”	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
