The Computerized Voice Reservation System (e-CVRS) is a web based application that allocates and manages slots at designated airports. To properly manage the flow of traffic at these airports, the FAA requires that unscheduled operations have a reservation. This Web interface has been developed to simplify the reservation process and allow for more reservation flexibility.

In order to use e-CVRS, users are first required to register, at which time they provide a User Name, e-mail address and password. The email address and password are used to access the site on subsequent visits, when they log in to the site.

Note: The e-CVRS pages support usage by the following browsers:

- Internet Explorer 7.0
- Firefox 3.x or newer

Slot Controlled Airports Reservation Program

More information on the reservation requirements for the Slot Controlled Airports can be found below:

- [Guidance for Obtaining Reservations for Unscheduled Flights at New York LaGuardia and Washington Reagan National Airports](#)
- [Special Operations Waiver Procedures](#)
