You may remember recently completing a demographic questionnaire for the evaluation. The interviews we are conducting are the second, and final, stage of the evaluation.

Noyce: The Noyce Program provides funding to higher education institutions via (a) scholarships, (b) stipends, and (c) other means of programmatic support to recruit and prepare science, technology, engineering, and mathematics (STEM) majors and other professionals to become K-12 STEM teachers and teacher leaders. Projects funded by the Noyce Program may be called different names at different schools or institutions.

Evaluation: The purpose of the Noyce Program evaluation is to (a) understand overall perceptions of the Program from both individuals who have applied for and/or received a Noyce award and those who have never applied and/or been awarded, and (b) identify what is working well and opportunities for growth. Information from our evaluation will help support the overall goal of increasing diversity within the STEM teacher education field. In addition, NSF may use the information from this evaluation to inform other NSF or government agency efforts.

Confidentiality: We take privacy seriously, and data related to identifiable characteristics of individuals, institutions, and schools will be used for evaluation purposes only to provide the National Science Foundation information about what is working well and potential growth opportunities. Information shared with us in the evaluation will be stored on a password-protected cloud drive. WhitworthKee Consulting will not disclose or release identifiable information to anyone (including NSF staff or other Noyce project members) outside of the WKC Evaluation Team.

Do you have any other questions I can answer?

Closing

Have a great day!
