onal Group. There should be one line for each resource. Please be succinct in the detail field.

Dedicated office space

Manufacturing research facilities and equipment

Lab space for execution of Engine project and student projects

Large facility oufitted with advanced prototyping and manufacturing equipment; lead us-inspired R&D Dedicated lab space

Facilitate technology transfer efforts; Support for venture funding pipelines and commercialization

Center for translating new technologies into real-world products

Partnership coordination; Workforce training initiatives

Large population of underserved students; Lead outreach with partners; develop workforce training pro Postdoctoral researcher mentoring program

Lead student entrepeneur programs

Training students to be ready to enter the workforce

Dedicated office space

Lead outreach with partners within the state

Dedicated office space; access to conference and meeting facilities; updated includes additional dedicat Dedicated office space; access to conference and meeting facilities

BAA Language (emphasis added)

A.3.7. Existing and New Resources to be Made Available for the Project (up This section is used to assess how the proposed Engine will leverage existing and ne the project. Proposers should describe only **those tangible resources** (e.g., fundin equipment, human capital, datasets) that are **directly applicable to the proposed first two years** of operation, should it be funded. Such information must be provide and not in other parts of the proposal (e.g., Budget Justification, Project Description).

Although the resources described are not voluntary committed cost sharing as define the Foundation does expect that the resources identified in this section **will be provavailable**, should the proposal be funded. PAPPG Chapter VII.B.1 specifies procedure recipient when there are post award changes to objectives, scope, or methods/proce

Within this section, proposers should describe the resources in the following **two dis categories**. In both categories, include only those resource contributions (e.g., fund equipment, human capital, datasets) that will support and advance the Engine's stra

- 1. Currently Available Resources: Provide information on the relevant currently e available to the proposing team from internal and external sources, including all part of a resource has already been contributed to an ongoing collaboration amount the Engine's participating organization and partners, describe what percent resource will be available for the Engine's activities. Proposers should briefly these resources will be allocated to specific activities described in the Project Description.
- 2. **New Resource Contributions:** Provide information on new resource contribution committed by external sources, **as stated in their letters of collaboration** (see § New resource contributions that are not documented in a letter of collaboration show here. Proposers should briefly summarize how these new resources will contribute to described in the Project Description. **Proposers will be asked to provide a detail contributions prior to receiving an award**.

NSF expects that the internal and external resources provided to the Engine will increduration of the award thereby demonstrating increased partnership engagement and the long-term sustainability of the Engine, and continued growth of the innovation education availability and utilization of these resources will be assessed during the post-award process.

R/D-1

TR-1

EB-1

- **a. Ecosystem Building:** ecosystem building helps grow, build, support, and nurture the development of an inclusive initiatives, or efforts that engage entrepreneurs, policymakers, philanthropists, and other regional and community saystem-wide approach to foster innovation and a culture of DEIA. Ecosystem Building Projects are distinct from us workforce development project.
- **b. Engine Core Functions:** Engine efforts that fall with Use-Inspired R&D, Translation of Innovations to Impact Management
- **c. Existing and New Resources:** Tangible resource contributions (*e.g.*, funding, facilities, equipment, human capital, are directly applicable to the proposed Engine in its first two years of operation, should it be funded. Per the BAA, of the original proposal submission should be included.
- d. Formal Partner: a partner organization that has a signed NSF Engines partnership agreement
- **e. Governance and Management:** Costs related to oversight of all aspects of the Engine, management of the Engine requirements. This should also include costs associated with <u>all positions</u> designated as part of the leadership team
- f. Informal Partners: a partner organization that does not have a signed NSF Engines partnership agreement
- **g.** Infrastructure Construction: Costs covering all building construction as well as design and engineering services, a be included. Space outfitting items for existing or new spaces, such as furniture, should also be included.
- h. Lead Organization: Per BAA, the NSF Engine award recipient is the lead organization and has full responsibility for the results achieved. The lead organization is responsible for oversight of all aspects of the Engine, including the Engreporting requirements. The lead organization must have a significant presence and vested interest in the region of
- i. Other Ecosystem Building Project: An Ecosystem Building Project that crosses more than one programmatic cates Engine at large. For example, a project that involves developing the financial sustainability across the Engine, inclus management efforts.
- **j. Partner Organization:** An organization that actively participates or is involved in one or more NSF Engine projects service work, where there is no active participation and collaboration, will not be regarded as an Engines partnership
- **k. Project:** An operational, time-limited project with an identified end state in support of an Engine making progress goals.
- **I. Technology research level (TRL):** A framework that measures the maturity level of a technology throughout its re ranges from 1 to 9, with 9 being the most mature technology.
- m. Translation of Innovations to Practice Activity: support development of products, technologies, or bringing serve mechanisms), that are currently within the Technology Readiness Levels (TRLs) 6-9. In addition to specific translation translation. For example, development of startups, the processes, structure, and expertise required to support contropportunities, and ongoing stakeholder engagement.
- **n. Translation of Innovations to Practice projects:** development of a specific product, technology, or bringing a service to into TRL 6-9 and with the aim to advance further along the TRL spectrum.
- **o. Use-inspired R/D Activity**: support the development of products, technologies, or bringing services to market (w currently within the Technology Readiness Levels (TRLs) 1-5. Activities must be inspired by the current regional demindustry and/or for end users. In addition to specific R&D projects, activities include ecosystem building efforts in su engagement, development of R&D funding calls, and development of testbed infrastructure.

- **p. Use-inspired R&D projects:** development of a specific product, technology, or bringing a service to marke into TRL 1-5 and with the aim to advance further along the TRL spectrum.
- **q. Workforce Development Activity:** A workforce development activity is one that supports the creation and imple development programs at all levels relevant to an Engine's key industries and/or technology focus areas. In addition ecosystem building efforts in support of workforce development.
- **r. Workforce Development projects:** specific job training, development opportunities, and/or education opportunities alo success in the workforce related to an Engine's key industries and/or technology focus area.
