

## **Non-substantive Change Request**

### **0535-0002 – Field Crop Production**

#### **Row Crop County Estimate Survey**

The Row Crop County Estimate Survey for Crop Year 2024 has been reinstated following a previous decision to discontinue it. This non-substantive change will reinstate the survey. The total burden for the Row Crop County Estimate Survey has been adjusted back to the OMB-approved hours of September 25th, 2023, which were 24,071 hours. The Annual Cost to the Federal Government has been adjusted to \$11.85 million. Additionally, the total burden hours for the ICR will be increased to 129,676 from 111,621. However, the approved questionnaire content will remain unchanged.

<sup>1/</sup> The surveys likely have only one mailing with followup phone enumeration.

<sup>2/</sup> The publicity materials are mailed out with each survey. The surveys likely have only one mailing with followup enumeration. The exception is the Crop Progress and condition report which has the same sample each week, the publicity materials are mailed out only once to this group.

<sup>3/</sup> These surveys are done under cooperative agreements.

<sup>4/</sup> A small amount of respondent burden was included in this approval for small cognitive testing. Any large scale tests will be submitted under the Generic Testing docket 0535-0248.

<sup>5/</sup> Some burden was left for the County Agricultural Production Surveys in case State cooperators want to fund samples to produce county-level estimates for select commodities in select State under full cost recovery basis.
