[LEAD for one-person households] This month we are asking some questions about food used in your household and the ways you are managing to meet your food needs.

[Lead for two or more person households] This month we are asking some questions about food used in your household and the ways you are managing to meet your food needs. (The best person to answer would be the adult most knowledgeable about food shopping and meal preparation. Would that be you or someone else?)

[Change respondent if needed and available, otherwise continue with current respondent]
[If group quarters, go to S9]

NOTE: This question previously asked "If that is because you shop for food infrequently, how much would the weekly average be over several weeks?". The previous version asked the respondent to determine the weekly average. The new question asks the respondent how much they spend in a month. The survey software instrument will then calculate the weekly average for the respondent to reduce respondent burden. We still want to enter a weekly average in the data even though the question now asks for a monthly average.
