ANIMAL AND PLANT HEALTH INSPECTION SERVICE
VETERINARY SERVICES
2150 CENTRE AVE, BLDG B

Your participation is vital and will help APHIS understand the occurrence and extent of HPAI detections in cattle. APHIS will safeguard study data as Confidential Business Information (CBI), as defined in the U.S. Code of Federal Regulations (CFR) 19 CFR 201.6, and we will utilize exemption 4 for any Freedom of Information Act (FOIA) (5 U.S. Code 552) requests for survey information associated with this study. Response is voluntary and you may discontinue participation at any time.

Instructions

We are asking you to fill out this survey to provide information on daily farm activities, facility and premises practices, deliveries to the premises, and sick cattle. The purpose of this survey is to better understand the emerging health syndrome in dairy cattle first announced by USDA, March 25, 2024, and to explore potential risk factors for infections in cattle. Any reports from this study will combine the data from all participants. The results of this survey will be summarized to develop hypotheses and to identify specific topics for future follow-up studies.

To support rapid data extraction and analysis, please use and save the fillable form electronically when possible. The form can be downloaded and used on any device with Adobe Acrobat.

In the questionnaire, we frequently ask questions about a **30-day reference period**. Questions regarding the “**30-day reference period**” refer to the **30 days prior to the date that clinical signs were first observed** on the premises. You might find it helpful to have a calendar and your records handy.

a. Today's date (mm/dd/yyyy): _____ date1

b. Date first clinical signs observed (mm/dd/yyyy): _____ date2

c. Date 30-days **before** first clinical signs observed (mm/dd/yyyy): _____ date3

All questions that ask about the “30-day reference period” refer to the dates between b. and c. above.
