

Author Full Name : Julie Killingworth Kasel**Received Date :** 01/08/2025 09:44 PM**Comments Received :**

My name is Julie Killingworth Kasel. I am 55 years old with Progressive Sarcoidosis. I have an orphan manifestation where inactive Vitamin D from Sunlight turns into an active form of Vitamin D. I have barely survived Crisis Hypercalcemia twice that left significant damage to my Lungs and Liver. There is NO humane, effective and affordable non-scheduled pharmaceutical options for my painful debilitating rare primary and orphan secondary diseases. The CDC invaded my life ripping away my ability to deal with my devastating fate with dignity and grace. The CDC guidelines have made my already struggling existence unsurvivable. There was not one rare disease specialist involved. The CDC has targeted the most disenfranchised citizens to be subjected to exploitation, privacy invasion, discrimination, stigmatization, criminalization. We know from the FOIA of your employees conspired with NGO like PROP, Shatterproof, Michigan Open, Pharmed Out and Steven Rummier Hope Foundation that the intentions were the consequences were intentional. We know Dr. Len Paulozzi co-founded PROP with Andrew Kolodny and two Core experts Dr. Gary Franklin and Dr. Jane Ballantyne in 2010. We know Dr. Dowell, Franklin and Paulozzi took instructions on how to frame the false narrative prescription medication caused the overdoses from PROP on the back channels. We know the CDC was aware and concealed illicit manufactured fentanyl was flooding the nation from the 10/26/2015 HAN alert before the guidelines were published. CDC has adamantly refused to even acknowledge Sarcoidosis exists, even Congressman Bilirakis graciously petitioned on my behalf only to be denied. The CDC refuses to do the simplest action by listing my disease in their A-Z index but decided to hire unqualified grifters to write guidelines that became Law prohibiting me from any medically necessary scheduled pain and suffering medication while trapped in a body progressively deteriorating from an incurable disease. The guidelines caused my beloved father was tortured with terminal Neurosarcoidosis. People only get one dignified end of life and the CDC stole it from him. The CDC ripped away his dignity and death and destroyed my existence. Unfortunately I am well aware the CDC does not care and this is just more placating. I honestly believe that you are all psychopaths. I was born with my disease, which makes the CDC vicious targeting of me especially with the discriminatory profiling PDMP a civil rights violation. The CDC and your cohorts at the DEA have waged war against people with the most horrific rarest incurable progressive diseases with no accountability or apology. The CDC ignored warnings by prominent and renowned scientific leaders that your lowest quality guidelines would cause immense harm. I believe the National Guard should empty the building to watch over the deadly pathogens the CDC is completely incompetent to guard. It's disgraceful that Dr. Debbie Dowell, Dr. Grant Baldwin and Dr. Christopher Jones who assisted Dr. Paulozzi in inflating overdoses by combining illicit and licit opioids are still employed at the CDC. I know that Dr. Paulozzi passed away in 2021 after a long undisclosed illness, I can only assume he was treated with end of life dignity than he endured my father would be denied. I have indisputable proof to verify my claims. I tried over a dozen times to attach documents in this docket with no avail. Thank you.
