Please rescind the guidelines entirely and help reform the DEA. Physicians should not be imprisoned for practicing medicine. Patients shouldn't be treated like criminals. The guidelines are based on poor quality evidence and are used to justify these actions. Way too many people are suffering and dying in/from pain. Thank you for the opportunity to comment. I am a physician married to a physician, and we both have severely painful, progressive, incurable conditions. We have suffered the same lack of access other patients have since prior to the guidelines, which made things worse.
