The cdc had no business publishing the 2016 opioid guidelines. They destroyed my life. Before the guidelines, my pcp prescribed my opioids and I was able to be a high school math and science teacher. Once the guidelines came out, I was told to see pain management and my insurance company kept denying the doses and meds I was on. It went on for 7 months of a force taper until it destroyed my body and I had to retire early and go on ssdi.
