I have been on low dose opiod for 10 years, i moved to mo. To watch over parent with dementia. Mo. Would not treat my pain, unable to care for mother she is now in nursing home. I am unable to take care of all mydaily chores and most days sit in chair. I have high blood pressure. My pain wakes me up at night some nights only 4 hours sleep. It affects my thinking. These BARBARIC rules for nontreatment of pain is LITERALLY KILLING ME. We treatanimal pain better than human pain. It IS ELDER ABUSE. ABUSE !
