The 2022 revision of the 2026 guidelines have not been implemented. Drs are afraid to prescribe opioids to pain patients. I have been a patient with the same Dr for 17 years and they won't return me to a proper dose of medication to help reduce my pain. I am no longer able to help in my community or go to family functions. The DEA has been cutting supply, now 56%, so trying to obtain the low amount of medication is very difficult. The monthly urine test, finding a pharmacy to fill prescription, being treated like a criminal. I'm not a criminal, my Dr is not a criminal. What the CDC did is a horrible overreach and is criminal. Millions of innocent pain patients are suffering from the CDC recommendations that the DEA, DOJ, ATF and other law enforcement agencies have used to attack providers. This has driven many good people to use street drugs or commit suicide. It's horrible what has happened to the people that use to have some quality of life but not any more. Stop this inhumane treatment and prosecution to the millions of people the overreach guidelines.
