The attack on doctors that would help thier pts with pain medication is nothing short of crumi al - the problem was a few docs/opioid shops and street drugs but instead of separating this - you all attacked respectable docs and patients who followed the rules with then - you have created a HUGE disaster and caused law abiding citizens to either have no quality of life or actually commit suicide! LEAVE THESE DOCS AND PTS ALONE! as long as both are maintaining good records and pt has a legitimate issue with pain - stop throwing them under the bus, getting them cut off or worse - go address the TRUE problem of street drugs. THE CHAOS that I have witnessed has been indescribable and horrific - 99% of Dr's only want to help thier pts live a decent life and for many that includes opioid use.
