I am a Legacy Pain Patient. Legacy meaning Long Term. I was going to a Pain Management Doctor for 6 Six Years until March of 2021. I have had 3 Surgical Fusions and 1 C MOBI Disc Implant to my Cervical Spine and I have Arthritis in my Facet Joints.

My Lumbar Spine has Herniated Discs L-3 to S-1 with Arthritis in the Facet Joints. I have not had surgery to this area but have had 6 years of non FDA Approved Injections which my Pain Management Doctor did non inform me prior to treatment would cause them to dry up further causing more pain proven by before and after MRI's. I am no longer taking the the Opioids that helped me function better in day to day life and I am in constant severe pain. Something has to be done.
