I'm a chronic pain sufferer. I have a fused back L4-S1 and severe arthritis in both hips. I'm only 58. If I didn't have my Percocet to take every day, 5 times a day, I would be bedridden. It allows me to have a life. I can walk. I can grocery shop. I can go to my drs appointments without using a wheelchair. I can help take care of my mom who has cancer. Thank you.
