The current climate for pain management is abysmal and down right shameful for a "first world country". People like me are offered little to no options. With redundant PDMPs and a health care score that providers DO use to treat you. Regardless of the claim it's not used for that. Narxcare is just a disgusting management technique. The entire government should be ashamed of themselves. You take people that would otherwise be productive and provide back to society. And let them go homeless with no hope while suffering painful medical condition. Absolutely shameful. You all need to look in the mirror and realize you're not God and have no business telling anyone what they can or can't do for themselves. Your superiority complex will be this country's downfall. Better change your ways before it's too late. You have too many restrictive measures in place that offer zero benefit for the complexity of society. All you've done is push people into the street to die from ACTUAL street drugs. Really smart. Really... bravo. The DEA, CDC, FDA etc need to step off and let people decide what's right for them. You act with righteousness, but the reality is you strangle our freedoms and poison everyone.
