

Disparity Impact Statement Template

Refer to the [Guidance for Preparing a Disparity Impact Statement](#) to complete and submit your disparity impact statement.

Report Header Information (to be prepopulated based on user login credentials)

Project Title

Period of Performance

Budget Period

Reporting Period

Organization Name, PD/PI Name, Phone, Email

Person submitting PPR if not PD/PI on the NOA

Section 1: Health Disparity Population

1. Health Disparity Population Identification

A population is a health disparity population if there is a significant disparity in the overall rate of disease incidence, prevalence, morbidity, mortality, or survival rates in the population as compared to the health status of the general population.” [Minority Health and Health Disparities Research and Education Act](#) *United States Public Law 106-525* (2000), p. 2498

According to your approved application, identify the health disparity population *within* the population(s) of focus identified in your application. For each health disparity population, select the box to indicate the health disparity population [Options will be included in a drop down menu].

Specify the data source (e. g. website link) for determining the health disparity population(s): [Options will be included in a drop down menu e.g. census data]

Referent Group (Required)

Identify the referent or comparison group, used to assess the level of difference in access, use, and outcomes and determine the health disparity population(s): [Options will be included in a drop down menu].

Justification

Identify the [social determinants of health](#) to justify the determination of the health disparity population(s). [Options will be included in a drop down menu].

Health Disparity Population Engagement Goal

According to your approved application, indicate the anticipated engagement of the health disparity population in project activities: [Options will be included in a drop down menu].

Disparate Population(s)	Year 1	Year 2	Year 3	Year 4	Year 5	Total

Section 2: Quality Improvement**2. Quality improvement and performance monitoring**

Indicate how the access, use and outcomes of project activities will be monitored for the:

- Health disparity population
- Broader population of focus

Will project performance data be used to monitor implementation activities? Y/N

If Y, describe

Will the access to project activities by health disparity populations be monitored? Y/N

If Y, describe

Will the level and quality of activities available through the project across population(s)? Y/N

If Y, describe

Section 3: National CLAS Standards**3. Adherence to the National CLAS Standards**

Will the Quality Improvement Process include the use of the [National CLAS Standards?](#) Y/N

If Y, describe
