

Exhibit B. Examples that show different versions of Section 1 (the list of prescriptions)

NOTE: The examples in this exhibit have been designed to illustrate some of the main variations in model language for Section 1 of the model Part D Explanation of Benefits (EOB). This section shows the list of prescriptions filled by a plan member.

These examples of Section 1 use numbers for the year 2022 and placeholders for the names of drugs. To help show how Section 1 would look in an actual Part D EOB, the examples include fictional information for the rest of the prescription-related text.

PART 1.

Examples 1-2: variations in text at end of Chart 1 that explain the totals

Examples 1 and 2 are designed to illustrate differences in the wording of the text that explains the total amounts which appear at the bottom of the Chart 1 list of prescriptions. These examples are for plan members who have no supplemental drug coverage. Each is in a different payment stage:

- Example 1 shows a version of Section 1 for a plan member who is in the deductible payment stage. This member receives no payments from the plan or from third parties.
- Example 2 shows a version of Section 1 for a plan member who is in the initial coverage period. This member receives payments from the plan, from the Extra Help program (these payments count toward out-of-pocket costs), and from Worker's Compensation (these payments do *not* count toward out-of-pocket costs).

[Example 1: Deductible payment stage, no payments from plan or others]

SECTION 1. Your prescriptions during the past month

- Chart 1 shows your prescriptions for covered Part D drugs for the past month.
- **Please look over this information about your prescriptions and check to see that it's correct.** If you have any questions or there's a mistake, Section 5 shows you what to do.
- **Drug Pricing Information (Drug Price & Price Change)**
 - The **Drug Price** shows the cost of each drug (including what you, your plan and other programs paid). The **Price Change** shows the percentage of the drug price since it was first filled during this benefit year.
 - There may be **Lower Cost Therapeutic Alternative drugs** (when applicable) listed below some of your current drugs. These are drugs that may be an alternative to the ones you are taking but with lower cost-sharing or a lower drug price. You may want to speak with your prescriber to see if the lower cost therapeutic alternative is right for you.

PART 2.***[Example 3: Using a separate chart for Supplemental Drug Coverage]***

Example 3 that follows shows a version of Chart 2, which is used to show prescriptions that are covered under the plan's Supplemental Drug Coverage. This chart follows Chart 1 (it comes immediately after the summary of year-to-date totals).

Showing a separate chart for prescriptions covered under the plan's Supplemental Drug Coverage helps reduce potential confusion by emphasizing that payments for these prescriptions do not count toward members' out-of-pocket costs or total drug costs.

NOTE: When Chart 2 is included in an EOB, the following sentence is added to the first bulleted point in the introductory section of Chart 1: "(Prescriptions for drugs covered by our plan's Supplemental Drug Coverage are shown separately in Chart 2)."

[Example 3: A separate chart (Chart 2) for prescriptions covered by Supplemental Drug Coverage]

CHART 2.

Your prescriptions for drugs covered by our plan’s **Supplemental Drug Coverage**

March 2022

- This chart shows your prescriptions for drugs that are not generally covered by Medicare.
- These drugs are covered for you under our plan’s Supplemental Drug Coverage.

	Plan paid	You paid	Other payments (made by programs or organizations; see Section 3)
{insert name of drug} 0.5 mg 03/01/22, ABC Pharmacy Rx# 836725300111, 30 day supply	\$2.80	\$5.00	\$0.00
Totals for the month of March 2022	\$2.80	\$5.00	\$0.00
These payments do <u>not</u> count toward your “out-of-pocket costs” or your “total drug costs” because they are for drugs that are not generally covered by Medicare. (See definitions in Section 3.)			

PART 3.**Example 4: Using “notes” on Chart 1 to show changes to the formulary**

Example 4 shows how explanatory notes are used in Section 1. These notes can provide members additional information related to a prescription, such as notes that highlight general price increases for that drug, or when a payment for a drug does not count toward out-of-pocket costs, or the drug is only partially covered because it is a compound drug that includes non- Part D drugs. The plan may also suggest lower-cost alternatives that a member and his/her doctor might consider in this section.
