

Justification for a Nonsubstantive Change  
Part D Drug Management Program  
CMS-10874, OMB 0938-1465

This December 2024 iteration proposes to correct an instruction in our active Second Notice. The instruction reads “[insert date 60 calendar days after the date of this notice]” when it should read “[insert date 65 calendar days after the date of this notice]”. The change revises the number of calendar days from “60” to “65”. The change aligns with our April 23, 2024 (89 FR 30448) final rule (CMS-4205-F, RIN 0938-AV24).

A clean version of the corrected Second Notice is attached to this nonsubstantive collection of information request along with a Crosswalk of the change and a Redline version of the corrected Second Notice.

We are not proposing changes to our active burden estimates.

We are not proposing changes to our active Supporting Statement.

We are not proposing any changes to any of our other active collection of information instruments.
