

Survey on Tribal Homelessness and Housing Support for Communities that Utilize Tribal TANF

Thank you for taking the time to complete this survey. Your insights are essential in helping us understand how Tribal TANF programs are currently addressing housing challenges and homelessness within tribal communities. This survey will take approximately 20 minutes to complete. According to the [2023 Annual Homeless Assessment Report](#), the percentage of people experiencing sheltered homelessness increased significantly between 2022 and 2023, with the largest increase—18 percent—among those who identify as American Indian, Alaska Native, or Indigenous (an additional 1,631 people). This highlights the urgent need to gather relevant data to better support tribal communities in addressing these challenges. Your participation will help inform targeted strategies to improve housing stability and access to support services.

The primary focus of the survey is to gather information on how TANF funds are being used to support homelessness prevention and housing stability efforts in tribal communities. Your responses will directly inform an Information Memorandum (IM) that provides guidance to Tribal TANF programs on addressing homelessness and housing needs. This IM will accompany a broader Dear Colleague Letter (DCL) on TANF to ensure alignment with national goals while addressing the unique needs of tribal communities.

Your participation in this survey is completely voluntary. Information collected will be kept private to the extent permitted by law.
