

GRRP Application Survey

Consent form

Thank you for participating in our survey. Your feedback is important.

Please ensure this survey is filled out by a person(s) at your organization who is knowledgeable about your organization's recapitalization efforts. If your organization applied to the Green and Resilient Retrofit Program (GRRP), please ensure this survey is filled out by someone familiar with that application.

1. GRRP Application Survey Consent Form

You have been selected to participate in a research study being conducted by the United States Department of Housing and Urban Development (HUD). The purpose of this study is to help HUD assess the success of the Green and Resilient Retrofit Program (GRRP) application process based on owners' perceptions of the design of the application and the program.

If you agree to participate, here are some things you should know:

1. If you are not a GRRP awardee, your participation is completely voluntary (not required), and will not affect your relationship with HUD in any way.
2. Your name will not be used in any reports about this interview.
3. All information collected during this study will be kept confidential, and your responses will not be identified individually in any way.

Completing this survey will help HUD answer the following research questions: Do property owners want the resources (loans and grants) that are offered through GRRP? Are the funds addressing the right needs? How can HUD balance reaching owners with properties most in need of upgrading, who may not have the capacity to leverage the funds offered through GRRP, with achieving the energy, carbon, and resilience goals of the program?

You may choose to skip or not answer any questions. You may also leave the survey at any time. You will not be affected in any way if you stop the survey or decide not to answer a question.

The survey will take up to 45 minutes.

Contact Information: The United States Department of Housing and Urban Development has authorized XXX to conduct this study. If you have any concerns about your participation in this survey or have any questions about the study, please contact XXX.
