SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for a revision to an approved collection of information. The National Oceanic and Atmospheric Administration's (NOAA) Office of Marine and Aviation Operations (OMAO) manages and operates NOAA's fleet of 15 research and survey ships and nine specialized environmental data-collecting aircraft. Comprised of civilians and officers of the NOAA Commissioned Officer Corps, OMAO also manages the NOAA Diving Program, NOAA Small Boat Program, and NOAA Uncrewed Systems Operations Center.

The research and survey ships operated, managed, and maintained by OMAO comprise the largest fleet of federal research ships in the nation. Ranging from large oceanographic research vessels capable of exploring the world's deepest ocean, to smaller ships responsible for charting the shallow bays and inlets of the United States, the fleet supports a wide range of marine activities including fisheries surveys, nautical charting, and ocean and climate studies.

NOAA aircraft operate throughout the world providing a wide range of capabilities including hurricane reconnaissance and research, marine mammal and fisheries assessment, and coastal mapping. NOAA aircraft carry scientists and specialized instrument packages to conduct research for NOAA's missions.

Housed within the NOAA Office of Marine and Aviation Operations and staffed by the U.S. Public Health Service (USPHS) Commissioned Corps officers, the Office of Health Services (OHS) is charged with directly supporting all personnel within the National Oceanic and Atmospheric Administration (NOAA).

NOAA medical officers work to maximize deployment readiness and minimize medically related disruptions to fleet, aircraft, and diving operations. OHS programs assess and promote mental and physical readiness within their operational medical discipline. Given the austere and geographically remote operational environments OHS supports, our officers are also responsible for preventing and containing disease in operational environments as subject matter experts in travel medicine. The forms contained in this collection will be used to make medical readiness recommendations for

individuals and to key leadership in operational environments.

The NOAA Health Services Questionnaire NF 57–10–01 is being revised to include supportive questions to document previous sailing dates and clarifying medical information within NF 57–10–01 to ensure OMAO has a complete medical history for all personnel aboard NOAA vessels.
