NBCCEDP Clinic Baseline and Annual Reporting System (B&C-BARS)

Thank you for using the nbcced.cdc.gov website to report data on your partner health systems and clinics. You will use the 'Data Entry' menu to provide baseline and annual information on each clinic, including characteristics of the health system and clinic population, breast and cervical screening rates, and evidence-based interventions and other clinic activities used to improve B&C screening. We encourage you to use the comment boxes at the end of each section to explain irregular data or provide context. For example, why are you "not confident" in the data you are reporting?

News/Updates

- February 24, 2023: The revised B&C-BARS tab is now active. See the "Help-GettingStarted" document for more information on using the system.

Documents and additional resources for the NBCCEDP Clinic Baseline and Annual Reporting System

- Clinic Data Folder in Resources Tab (07/21/2022)

If you have any questions or problems with the site, please contact technical support at NBCCEDP Support.

Public reporting burden of this collection of information is estimated to average 40 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-1074).
