*10. Provide an overview of the system:					
<p>dbGaP, the database of Genotype and Phenotype, is a database designed to archive and distribute data from genome wide association (GWA) studies. *17. Does/Will the system collect, maintain (store), disseminate and/or pass through PII within any database(s), record(s), file(s) or website(s) hosted by this					

system?
<i>TIP: If the answer to Question 17 is "No" (indicating the system does not contain PII), only the remaining PIA Summary tab questions need to be completed and submitted. If the system does contain PII, the full PIA must be completed and submitted. (Although note that "Employee systems," – i.e., systems that collect PII "permitting the physical or online contacting of a specific individual ... employed [by] the Federal Government – only need to complete the PIA Summary tab.)</i>
No
<i>17a. Is this a GSS PIA included for C&amp;A purposes only, with no ownership of underlying application data? If the response to Q.17a is Yes, the response to Q.17 should be No and only the PIA Summary must be completed.</i>
<i>*19. Are records on the system retrieved by 1 or more PII data elements?</i>

No
<i>*30. Please describe in detail: (1) The information the agency will collect, maintain, or disseminate (clearly state if the information contained in the system ONLY represents federal contact data); (2) Why and for what purpose the agency will use the information; (3) Explicitly indicate whether the information contains PII; and (4) Whether submission of personal information is voluntary or mandatory:</i>
Data collected includes the researchers name and institutional information, a research abstract (reason for requesting the data) and co-investigator information. This is collected for further contact with the PI and to provide controlled access to the data requested and to provide public access to the research uses of the data.  The information collected from co-investigators is the same as that from Principal Investigators: name, business address, and email address. The submission of personal information is voluntary.  The dbGaP database contains phenotype and genotype data from researchers and from centers who are conducting genome-wide association studies. NLM/NCBI summarizes, reformats, and redistributes these data acting as a central repository for these types of studies.  The information collected is from studies sponsored by an NIH Institute and is sent from the principal investigator or the center conducting the study. All data received is certified as de-identified data. After NIH review of a request from an investigator and his/her sponsoring organization, the genotype and phenotype data is made available for that investigator to access.  Data are categorized by an accession number assigned by NLM/NCBI (not the investigator) to the dataset. Information is retrieved by the name of the study. The capability exists to search the public data for the name of the study, the protocols used, and the dataset summaries but the retrieval is by accession number.  No information in dbGaP is collected directly from patients. Data has not been collected from other NIH databases. If data were to be provided from other NIH databases, e.g., an intramural study, it would be provided under the same conditions as external data, i.e., all data would be de-identified.  There are no names or personal identifiers linked to the phenotype/genotype records. All data are de-identified prior to the time it is delivered to NLM/NCBI.
<i>*31. Please describe in detail any processes in place to: (1) Notify and obtain consent from the individuals whose PII is in the system when major changes occur to the system (e.g., disclosure and/or data uses have changed since the notice at the time of the original collection); (2) Notify and obtain consent from individuals regarding what PII is being collected from them; and (3) How the information will be used or shared. (Note: Please describe in what format individuals will be given notice of consent [e.g., written notice, electronic notice, etc.]):</i>
No
<i>*32. Does the system host a website? (Note: If the system hosts a website, the Website Hosting Practices section is required to be completed regardless of the presence of PII)</i>
Yes
<i>*37. Does the website have any information or pages directed at children under the age of thirteen?</i>
No
<i>*50. Are there policies or guidelines in place with regard to the retention and destruction of PII? (Refer to the C&amp;A package and/or the Records Retention and Destruction section in SORN)</i>
No
<i>*54. Briefly describe in detail how the PII will be secured on the system using administrative, technical, and physical controls:</i>
No

## PIA REQUIRED INFORMATION

### 1 HHS Privacy Impact Assessment (PIA)

The PIA determines if Personally Identifiable Information (PII) is contained within a system, what kind of PII, what is done with that information, and how that information is protected. Systems with PII are subject to an extensive list of requirements based on privacy laws, regulations, and guidance. The HHS Privacy Act Officer may be contacted for issues related to Freedom of Information Act (FOIA) and the Privacy Act. Respective Operating Division (OPDIV) Privacy Contacts may be contacted for issues related to the Privacy Act. The Office of the Chief Information Officer (OCIO) can be used as a resource for questions related to the administrative, technical, and physical controls of the system. Please note that answers to questions with an asterisk (\*) will be submitted to the Office of Management and Budget (OMB) and made publicly available in accordance with OMB Memorandum (M) 03-22.

Note: If a question or its response is not applicable, please answer "N/A" to that question where possible.
