Bethesda, Maryland 20892

DATE: January 15, 2025

TO: NIH OMB Desk Officer  
Office of Management and Budget (OMB)  
Reports Clearance Officer, DHHS

FROM: Mikia P. Currie  
Chief, Project Clearance Branch

SUBJECT: Nonmaterial/Non-substantive change request for:  
National Institute of Drug Abuse (NIDA) Adolescent Brain Cognitive  
Development Study (ABCD Study®) – Audience Feedback Teams  
(OMB #0925-0781, Expiration Date 11/30/27)

This is a request for OMB to approve a nonmaterial/non-substantive change to the NIDA ABCD Study Audience Feedback Teams. (OMB #0925-0781, Expiration Date 11/30/27).

As described in the revised Supporting Statement A dated September 12, 2024 and approved on 11/27/2024:

- The instruments are used to pre-test and obtain feedback on questions and instructions proposed for use in the ABCD Study.
- **The respondents only provide feedback on the test questions, they are not asked to answer the test questions.**
- The stimuli included in data collection instruments (web surveys, group discussion guides, online bulletin board guides, or at-home materials review) will be updated up to twice per year; this includes adding new stimuli when pre-testing needs are identified, updating stimuli to test revisions to the stimuli, and removing and replacing stimuli when feedback is complete.
- **These non-substantive revisions to the information collection instruments will be communicated via change memos.**

As per the above, this memo communicates changes to the stimuli in the data collection instruments in Attachments G, I, K and M for upcoming testing.

This non-substantive request does not change the information collection's purpose, objectives, or overall burden to the public.

**Summary of Changes:**

The requested changes to the data collection instruments are as follows:

All attachments: Displaying new OMB expiration date.

#### Attachment G – Teen Web Survey

- Removed completed pre-test stimuli and associated questions: (23 questions total)
  - Disability test question (8 questions)
