If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:

The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?

[X] Yes [] No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

The QI listserv contains the universe of individuals who might be downloading QI software, which would be our respondents. We will (1) notify users through the listserv of the availability of a new ED-PQI module at the point of downloading the new v2023 of the QI software, including a link to the page on the QI website where software may be downloaded. (2) When a user goes to download the software, they will click on the button that says, "download." (3) At that time, they will be prompted to fill out a brief, optional survey, or to skip directly to download. If they select "skip," they may continue directly to download the software module. If not, they will be prompted to answer the survey questions.

In 2022, there were 3,815 downloads of QI software (any module, any format) from unique users. Assuming that about 20% of users will download the new ED-PQI module, that would be 783 downloads. Assuming a response rate of about 50%, there will be roughly 400 respondents.
