## **TITLE OF INFORMATION COLLECTION:**

Agency for Healthcare Research and Quality (AHRQ) Quality Indicators (QI) Customer Survey

## **PURPOSE:**

The AHRQ QIs are standardized, evidence-based quality measures that can be used with readily available hospital inpatient administrative data to measure and track clinical performance and outcomes, including inpatient mortality, surgical complications, and certain hospital-acquired infections. The survey will be used to gather information from current users about their experiences with and perceptions of the AHRQ QIs. In particular, the topics areas in the survey include: 1) Reasons for using/not using the AHRQ QIs and AHRQ QI resources, 2) Use of the AHRQ QIs for quality improvement, 3) Other measures used for quality improvement and the reasons for use, 4) Use of the AHRQ QI software, and 5) Opportunities to enhance user experience with the AHRQ QI program

## **DESCRIPTION OF RESPONDENTS:**

The primary audience for the AHRQ QI Customer Survey is current users of the AHRQ QIs; the survey will also include select questions that are relevant to the experiences of potential users, which will inform changes to the AHRQ QI program aimed at improving its relevance and usability for current and potential users. Respondents will include individuals involved in quality improvement efforts within care delivery or quality improvement-focused organizations, such as hospitals and health systems, Hospital Improvement Innovation Networks (HIINs), state and local government agencies, hospital associations (local, state or regional), or statewide or regional data organizations. Within this group of respondents, “users” are those organizations that report using the AHRQ QIs for quality improvement efforts and “potential users” are those that do not report currently using the AHRQ QIs.

☐ Yes ☒ No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

The QI listserv contains the universe of individuals who might be downloading QI software, which would be our respondents. We will (1) notify users through the AHRQ QI listserv, (2) conduct targeted outreach to key individuals on that list who we know are active users, (3) call out the survey in an AHRQ newsletter, and (4) post the survey to the QI website.

In 2024, there were 3,376 downloads of QI software (any module, any format) from unique users. We expect about 10% would complete the survey for a total of about 400 respondents.
