

ATUS Stakeholder Survey 2024

Introduction

Thank you very much for helping us improve the American Time Use Survey (ATUS). The ATUS provides nationally-representative estimates of how, where, and with whom Americans spend their time. It is the only federal survey that provides data on the full range of people's activities, including unpaid work such as childcare, housework, and volunteering.

Even if you are not a frequent user of ATUS products or have not used them at all, we would appreciate your feedback as it will help us understand your needs and experiences.

Your participation in this survey is voluntary. We estimate that it will take approximately 10 minutes to complete.

If you have any questions about this survey, please contact ATUSInfo@bls.gov and reference the ATUS User Feedback Questionnaire.

For more information about the ATUS, please visit: <http://www.bls.gov/tus>.

This voluntary survey is being collected by the Bureau of Labor Statistics under OMB No. 1225-0088 (Expiration Date: 1/31/2027). We estimate that this survey takes 10 minutes to complete. You are not required to respond to this collection unless it displays a currently valid OMB control number. We will use the information you provide to make improvements to BLS online publications. Your participation is voluntary, and you have the right to stop at any time. Results from this survey will be aggregated for internal use and individual results will not be made public. This survey is being administered by SurveyMonkey and resides on a server outside of the BLS Domain. The BLS cannot guarantee the protection of survey responses and advises against the inclusion of sensitive personal information in any response. By proceeding with this survey, you give your consent to participate in this survey.
