

The e-GGRT system shows the paperwork reduction act information on the footer to every screen.

The screenshot shows the EPA e-GGRT system interface. At the top, there is a navigation menu with links for HOME, FACILITY REGISTRATION, FACILITY MANAGEMENT, DATA REPORTING, EPA REPORTS, and HELP DESK. The user is logged in as Jennifer Bohman (JENBOHMAN). The main content area is titled "Test Facility 87" and "Subpart G: Ammonia Manufacturing (2024)". It includes an overview of reporting requirements, a table for "SUBPART G SUMMARY INFORMATION FOR THIS FACILITY", and two "UNIT SUMMARY" tables. A red circle highlights the "Paperwork Reduction Act Burden Statement" link in the footer.

Test Facility 87
Subpart G: Ammonia Manufacturing (2024)
Subpart Overview

OVERVIEW OF SUBPART REPORTING REQUIREMENTS
Subpart G requires affected facilities to report carbon dioxide (CO₂) process emissions from each ammonia manufacturing process unit. First, use this page to identify each ammonia manufacturing process unit and then enter greenhouse gas (GHG) data required by Subpart G for each ammonia manufacturing process unit and for your facility. You must also report the annual urea production and annual ammonia production for your facility. If there are any ammonia manufacturing process units monitored by CEMS, please enter those separately in the second UNIT SUMMARY section. For additional information about Subpart G reporting, please use the e-GGRT Help link(s) provided.

Reporters that elect to prepare their annual reports in XML instead of using the e-GGRT webforms, need to submit their XML files through the e-GGRT system. So these XML reporters would log into the e-GGRT system, upload their XML files, and proceed through the submission screens, all of which would include the link to the Paperwork Reduction Act Statement on every page.
