

Have you ever wondered what's in the air at work?

LET'S CLEAR THE AIR!

The National Institute for Occupational Safety and Health (NIOSH) is seeking **veterinary workers** for a study on **surgical smoke exposures**.

NIOSH wants to better understand:

- what chemicals are in the air at work
- common health effects
- how to reduce harmful exposures

>150 **CHEMICALS**
in surgical smoke

Some may be hazardous to human health, including some associated with cancer

NIOSH conducts research on worker safety and health.
NIOSH does not assess violations or levy fines.

What will I be asked to do?

Volunteers will be asked to complete:

- 1 Baseline questionnaire at your convenience (~25 mins.)
- 2 Post-shift questionnaire(s) during our site visits (~8 mins.)

Am I eligible?

You can participate if you:

- ✓ Have worked in a clinical veterinary practice at any time in the past 12 months
- ✓ Are 18 years old or older

I WANT TO PARTICIPATE!

Scan the QR code
and fill out the
interest form!

What else do I need to know?

Participation
and responses
are confidential

Study results will
not identify you or
individual workers

No cost to
participate other
than your time

Learn more
about NIOSH!

I'M INTERESTED! BUT I HAVE QUESTIONS.
Where do I learn more? Send us an email!
