

## MCS Screens RIB, SPOU, DIB

MCS is the Social Security Administration's (SSA) claim system for taking and processing title II and XVIII applications. It mirrors the paper application formats using an electronic collection method. MCS screens include data fields for technicians to complete with application responses and documentation of evidence. Its functionality includes propagation of data from SSA records and the ability to print and store an application summary, receipt and reporting responsibilities for Retirement, Wife's or Husband's Insurance Benefits, and Disability Insurance Benefits.

This screen package includes the multiple MCS screens technicians may complete when taking an application for Retirement, Disability and Wife's or Husband's Insurance Benefits.

### Menu Screen

To start a Retirement or Disability claim in MCS, technicians input the Number Holder's (NH) Social Security Number (SSN) and select "1=Establish" and function "3=New Claim" and the enter key. When technicians take a claim for spouse's benefits, they input the worker's SSN as the NH SSN and the SSN of the individual who is filing for spouse's benefits as the CL (claimant) SSN.

```

## MCS Screens RIB, SPOU, DIB RSDHI Claims Application (APPL) Screen

The APPL Screen establishes the claim type and collects the application questions that identify the number holder (NH), claimant (CL) and applicant when different from the claimant. Technicians can select up to two claim types (retirement and disability) when filing for benefits that are based on their own earnings record. When filing for spouse's benefits, the technicians select #4 – AUXSPO.

```
