

SOAR (Stop, Observe, Ask, Respond) to Health and Wellness Training (SOAR) Demonstration Grant Program Data Indicators

The SOAR Demonstration Grant Program's goal is to fund the implementation of SOAR trainings and capacity building to identify, treat, and respond to patients or clients who have experienced severe forms of human trafficking as defined by the Trafficking Victims Protection Act (TVPA) of 2000, as amended, among their patient or client population. SOAR is a nationally recognized, accredited training program delivered by OTIP's National Human Trafficking Training and Technical Assistance Center (NHTTAC) and designed to help target audiences identify and respond to those who are at risk of, currently experiencing, or have experienced trafficking and connect them with needed resources. Target audiences for SOAR trainings delivered by NHTTAC include professionals, organizations, and communities that address human trafficking in healthcare, behavioral health, public health, and social service settings. SOAR Demonstration Grant Program award recipients must provide the following program performance indicator data to OTIP on a quarterly and annual basis, as indicated.
