To submit a Final Result for this project or program, select the "Add Final Result" button. This button will appear 60 days prior to the project or program end date.

In 2-3 sentences, briefly describe the issue or problem that your project addresses.

0 / 8000

Briefly describe in non-technical terms how your major activities helped you achieve, or make significant progress toward, the goals and objectives described in your non-technical summary.

0 / 8000

Briefly describe how your target audience benefited from your project's activities.

0 / 8000

Briefly describe how the broader public benefited from your project's activities.

0 / 8000

Comments (optional)

Describe and explain any major changes or problems encountered in approach. Additionally, note opportunities for training and professional development provided, how results have been disseminated to communities of interest, and any new details regarding what the project or program plans to do during the next reporting period to accomplish the goals.

Revisions to the Result Form

NIFA plans to add the following fields to this form to have specific fields for items that respondents add to Comments or other fields currently:

Product Type _____   Description/Citation _____

Author(s) _____   ORCID(s) _____

DOI _____   Other Digital Persistent Identifier _____

Additionally, a multiple-choice certification statement will be added as follows:

I certify reporting for this project/program is in compliance with USDA Departmental Regulation (DR) 1020-006 concerning scholarly publications and data assets produced from extramural research supported wholly or in part by NIFA, for the current reporting period.

☐ Yes, any applicable scholarly publications have been submitted to the National Agricultural Library's (NAL) PubAg and any applicable data assets have been submitted to NAL's Ag Data Commons. These submissions included the NIFA grant or accession number and digital persistent identifiers for the publication or data asset (such as DOI) and the authors (such as ORCID).

☐ Yes, this project/program did not produce any scholarly publications during the reporting period and all data assets produced are exempt from DR 1020-006.

☐ N/A, this project/program did not produce any scholarly publications and data assets as defined by DR 1020-006 during the reporting period.

Final Result (Revision)

Note: The Final Result form is identical to the regular Result form and is grouped together for estimate of burden with the regular Result form for the purpose of this Supporting Statement.

Manage Critical Issues

California (Regents of the University of California) Plan Of Work - FY2024

Please complete the report before submitting.

Active

Endemic and Invasive Pests and Diseases
Initiated on: 11/26/2019

Last Updated: 2023

Term Length: Short-term (<1 year)

The Endemic and Invasive Pests and Diseases federal Critical Issue is one of the UC ANR Strategic Initiatives. It focuses on the following bulleted program areas that address the grand challenges of emerging pests, the public's understanding of the role of science in safe and effective pest management, and pursuing new technologies for existing pests.

- Keeping invasive pests and pathogens out of California
- New problems with existing pests and diseases
- Integrated Management

The Endemic and Invasive Pests and Diseases Strategic Initiative helps the state economy, protects natural resources, builds capacity of our people and communities, and helps ensure safe food and drinking water.

Update

- update to this Critical Issue
- additional update

Science Emphasis Areas: Agroclimate Science, Education and Multicultural Alliances, Environmental Systems, Food Safety, Sustainable Agricultural Production Systems
