Comment from Brown, Riata (APHIS-2024-0053-0011)

Posted by the Animal and Plant Health Inspection Service on Dec 11, 2024

As a livestock producers we are the only valid entities to submit a comment on this issue as we are the individuals who have the first hand experience on how to manage and protect our livelihoods. Why should producers be vilified for protecting their businesses that provide food on the tables of our US consumers? We are in support of the collection of information that is derived from the producers who are affected by predators and who have experience with predator management plans.
