Comment from Miller Land and Livestock (APHIS-2024-0053-0022)

Posted by the Animal and Plant Health Inspection Service on Dec 17, 2024

Hi, Our ranch is Miller Land and Livestock in Sublette Co. Wy. Between our 2 entities we own 20,000 acres and the ranch has been in the Miller family for 130 years. We run 2000 head of mother cows and keep the calves to ye

We are serious ranchers and make our money ranching not by any outside means. We have very little trouble from predators, it just comes with the territory.

We are appalled by the lack of respect for predators. They should have the same protection against torture as any other animal. They are all living, feeling beings merely doing what God made them for.

For starts, no animal should be run down or over by motorized vehicles. And anyone that does this should be severely punished not a mere slap on the hand! It is horrid to derive pleasure through something else's suffering and Wyoming needs to wake up and stop the ignorant people that participate in this. It is a terrible stain on our state!
