Form Approved
OMB No. 0920-xxxx
Exp. Date xx/xx/xxxx

Consent to be in a Research Study

Taxi/Rideshare Drivers and Fatigue Study

CDC estimates the average public reporting burden for this collection of information as 30 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX).

1 Key Information

- We're doing a study about sleep and alertness in taxi/rideshare drivers
- If you're a licensed taxi or rideshare driver in San Francisco, and plan to be for 5 months, you are eligible to take part
- There are 5 study periods. Each study period is 10 days
- The 5 study periods will be spread across 5-6 months
- We will provide a device to wear on your wrist, all day, for the 10 days of each study period
- We will provide a tablet or smartphone for use during the study.
- In the last 7 of the 10 days of each study period, you will be asked to complete a 2-minute electronic diary and attention test, 5 times/day
- We may ask you to complete a 3-hour online training
- Being in our study is 100% optional. There are no penalties (like fines, costs or bad feelings) for not signing up
- If you sign up, you can change your mind any time with no penalty
- We will check on you via text or email to see if you have any questions or issues while you complete the study activities
- We won't interrupt during a shift or tell you to stop working
- We will protect any information you provide as much as possible
- No names or other personal information will be stored with the study data
- Your data will be identified with a study code only
- There is always a small chance, however, that data security could be compromised
- In order to provide you with gift cards, the government requires that we get your address and social security number – information that we will store separately
- We will not provide the company a list of who participated, although it is possible that you will be identified when you wear the wrist device, for example

- We will check on you via text or email to see if you have any questions or issues while you complete the study activities
- We won't interrupt during a shift or tell you to stop working
- We will protect any information you provide as much as possible
- No names or other personal information will be stored with the study data
- Your data will be identified with a study code only
- There is always a small chance, however, that data security could be compromised
- In order to provide you with gift cards, the government requires that we get your address and social security number – information that we will store separately
- We will not provide the company a list of who participated, although it is possible that you will be identified when you wear the wrist device, for example

Taxi/Rideshare Drivers and Fatigue Study

CDC estimates the average public reporting burden for this collection of information as 30 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX).

1 Key Information

- We're doing a study about sleep and alertness in taxi/rideshare drivers
- If you're a licensed taxi or rideshare driver in San Francisco, and plan to be for 5 months, you are eligible to take part
- There are 5 study periods. Each study period is 10 days
- The 5 study periods will be spread across 5-6 months
- We will provide a device to wear on your wrist, all day, for the 10 days of each study period
- We will provide a tablet or smartphone for use during the study.
- In the last 7 of the 10 days of each study period, you will be asked to complete a 2-minute electronic diary and attention test, 5 times/day
- We may ask you to complete a 3-hour online training
- Being in our study is 100% optional. There are no penalties (like fines, costs or bad feelings) for not signing up
- If you sign up, you can change your mind any time with no penalty
- We will check on you via text or email to see if you have any questions or issues while you complete the study activities
- We won't interrupt during a shift or tell you to stop working
- We will protect any information you provide as much as possible
- No names or other personal information will be stored with the study data
- Your data will be identified with a study code only
