

**Annual Progress Reports for Injury Control Research Centers (ICRC)
(OMB no. 0920- 1454; exp. date 1/31/2028)**

**Proposed Non-Substantial Changes: Justification and Overview
Date Submitted: 03/12/2025**

Justification

CDC/NCIPC is requesting a change request to revise questions to better align with the priorities of the current administration.

Project Description

The goal of this information collection request (ICR) is to collect Annual Progress Report (APR) data to monitor the grantees under Grants for Injury Control Research Centers (ICRC). We also collect Success Stories, as needed, from grantees, to showcase the invaluable work they are doing in injury and violence prevention. We are proposing minor edits to the APR and Success Stories questionnaires to better align with the priorities of the current administration.

Proposed Changes

We would like to change a few questions, as follows:

- Change from asking “have materials been tailored to cultural” to “have materials been tailored to the intended audience?”
- We would like to change three instances of “priority” to “intended” populations.
- We would like to change one instance of “marginalized or underserved groups” to “intended populations.”
- We would like to delete a question that asks about “structural barriers to health equity.”

Change to Burden and/or Cost

This Non-Substantive change requests does not include changes to the currently approved burden and/or costs.
