

**Non-substantive Change Request**  
**OMB Control Number 0920-0740; Expiration Date 05/31/2027**  
**Medical Monitoring Project**  
**Date Submitted: 03/18/2025**

**Summary of request:** CDC/NCHHSTP is requesting a change request to revise questions to align with EO 14168 *Defending Women from Gender Ideology Extremism and Restoring Biological Truth to the Federal Government*.

**Description of Changes Requested:** This request includes updates to questions used in the Medical Monitoring Project to be in accordance with EO 14168. Specifically, we are requesting to delete questions and response options that ask about gender, and to edit questions to only ask about male or female sex.

Please check the boxes below if your request includes:

- Revision of an existing question(s)
- Deletion of an existing question(s)

There is no change in Burden Hours associated with the modifications made in compliance with EO 14168. Changes are detailed in Table A below and red-lined and clean data collection forms are provided in Appendices 1a, 1b, 1c, 1d, 2a, and 2b.

**Other Considerations (optional):** The interview data collection forms contain red-lined changes to programming logic made necessary due to the EO-compliant modifications, but these are not read to the participant. The questionnaire is administered by an interviewer and is not shown to the respondent. The interviewer does not read the response options of “Don’t Know” and “Refuse to Answer” to respondents. These response options are included for the sole purpose of enabling the interviewer to move forward with the interview in the event the respondent is unwilling or unable to provide a clear response. These hidden options are included for all questions in the instrument and have been retained in the edited sex question.
