Supporting Statement for **FERC-546, Certificated Rate Filings: Gas Pipeline Rates**

The Federal Energy Regulatory Commission (Commission or FERC) requests that the Office of Management and Budget (OMB) review and approve FERC-546, Certificated Rate Filings: Gas Pipeline Rates, for a three-year period. FERC-546 (OMB Control No. 1902-0155) is an existing Commission data collection, as stated by 18 Code of Federal Regulations (CFR), 154 and 284.¹

1. CIRCUMSTANCES THAT MAKE THE COLLECTION OF INFORMATION NECESSARY

The following list outlines four circumstances under which the FERC-546 information collection requirements for certificated rates must be met:

A company decides to:

- 1. Construct and operate a new jurisdictional pipeline²;
- 2. Expand its certificated pipeline capacity by constructing a lateral pipeline, adding compression or providing storage at incremental or cost-based rates;
- 3. Build a new liquefied natural gas facility; or
- 4. Provide gas storage and negotiate market-based rates.

The Commission also is authorized under Section 402 and 403 of the Department of Energy Organization Act, to establish, review, and enforce priorities for curtailments under the Natural Gas Act (NGA).

Under the circumstances 1-3, the company must file its FERC-546 cost data along with an application for a certificate of public convenience and necessity under the statutory requirements of NGA Section 7(c). For circumstance 4, the company must file its FERC-546 information with an application under NGA Section 4(f).

The FERC-546 includes the following:

- Supporting information for proposed initial rates (e.g. cost-based, market based, incremental rates);
- Pro forma tariffs;
- Motions to put proposed initial rates into effect subject to Commission findings on the related certificate;
- Unexecuted precedent agreements;

¹ More specifically requirements are contained within 18 CFR 154.4, 154.7, 154.202, 154.204-208, 154.602-603 and 284.501-505.

² Also known as a "greenfield" pipeline.

Section 16 of the NGA grants the Commission administrative powers including the ability to define accounting, technical and trade terms, prescribe forms, statements, declarations, or reports and to prescribe rules and regulations.

2. HOW, BY WHOM AND FOR WHAT PURPOSE IS THE INFORMATION TO BE USED AND THE CONSEQUENCES OF NOT COLLECTING THE INFORMATION

The Commission reviews the FERC-546 materials to approve rates and tariff changes associated with an application for a certificate under NGA Section 7(c). Additionally, the Commission reviews FERC-546 materials in 4(f) storage applications to evaluate market power and decide whether to grant, deny, or condition market-based rate authority for the applicant. The Commission also uses the FERC-546 information to monitor jurisdictional transportation, natural gas storage, and unbundled sales activities of interstate natural gas pipelines and Hinshaw³ pipelines. In addition to fulfilling the Commission's obligations under the NGA, the FERC-546 enables the Commission to monitor activities, evaluate transactions, ensure competitiveness, and improved efficiency of the gas industry's operations. In summary, the Commission uses the FERC-546 information to:

- Ensure adequate customer protections under section 4(f) of the NGA;
- Review rate and tariff changes by natural gas companies for the transportation of natural gas and natural gas storage services;
- Provide general industry oversight; and
- Supplement documentation during its audits process.

Failure to collect this information would prevent the Commission from being able to monitor and evaluate transactions and operations of interstate pipelines and perform its regulatory functions.

3. DESCRIBE ANY CONSIDERATION OF THE USE OF IMPROVED INFORMATION TECHNOLOGY TO REDUCE BURDEN AND THE TECHNICAL OR LEGAL OBSTACLES TO REDUCING BURDEN

³ Hinshaw pipelines are those that receive all out-of-state gas from entities within or at the boundary of a state if all the natural gas so received is ultimately consumed within the state in which it is received, 15 USC 717(c). Congress concluded that Hinshaw pipelines are "matters primarily of local concern," and so are more appropriately regulated by pertinent state agencies rather than by FERC. The Natural Gas Act section 1(c) exempts Hinshaw pipelines from FERC jurisdiction. A Hinshaw pipeline, however, may apply for a FERC certificate to transport gas outside of state lines.

The Commission provides ongoing effort to apply improved information technology to reduce the burden related to this information collection. Most documents may be filed electronically with the Commission via the Internet (e.g. via eFiling, eForms, eTariff). These efforts are part of FERC compliance with the Paperwork Reduction Act, the Government Paperwork Elimination Act, and the E-Government Act of 2002.

By issuing Order No. 714⁴ in 2008, the Commission revised its regulations to require electronic filing of all tariffs, tariff revisions and rate change applications for public utilities, natural gas pipelines, oil pipelines and power administrations starting in April 2010.

FERC-546 data can be embedded within the XML schema of the eTariff system. Providing FERC-546 filers with the eTariff system for submitting information reduced physical storage space needs and document processing time. It has also provided easier tracking of document filing activity and reduced mailing and courier fees. The eTariff system allows concurrent access to FERC-546 tariff filings by multiple parties as well as the ability to download and print tariff filings. It automatically sends filers an email indicating their filing has arrived at FERC and of its acceptance. All FERC-546 filings are also available electronically in FERC's eLibrary system.

4. DESCRIBE EFFORTS TO IDENTIFY DUPLICATION AND SHOW SPECIFICALLY WHY ANY SIMILAR INFORMATION ALREADY AVAILABLE CANNOT BE USED OR MODIFIED FOR USE FOR THE PURPOSE(S) DESCRIBED IN INSTRUCTION NO. 2.

The FERC-546 information concerns rates for new or changed transportation and storage services stemming from new or modified natural gas infrastructure. There is a relationship with the FERC-545 because that collection's data includes the cost and revenue studies that NGA Section 7(c) certificate holders file to support a rate after their initial certificated rate period elapses. However, there is no duplication between the FERC-546 and any other data collection. Finally, each FERC-546 filing is unique to the filing pipeline and activity.

The Commission published a notice within the Federal Register⁶ to help identify any duplication of the information in FERC-546. The Commission received no comments regarding this collection. No similar information can be used or modified. There are no other Federal agencies responsible for deciding whether or not to determine initial rates associated with an application for a certificate under NGA Section 7(c).

⁴ 73 FR 57515

5. METHODS USED TO MINIMIZE BURDEN IN COLLECTION OF INFORMATION INVOLVING SMALL ENTITIES

FERC-546 is a filing requirement pertaining to pipeline service filing obligations for the transportation, storage, and sale of natural gas. The FERC-546 filing collects data from both large and small respondent companies. The data required impose the least possible burden for companies while collecting the required information for the certificated rate filings. Use of the Internet to file documents electronically is the primary method the Commission uses to minimize the burden.

The filing of all documents within the data collection occurs through the eFiling interface as a means of reducing burden for respondents including small entities.

6. CONSEQUENCE TO FEDERAL PROGRAM IF COLLECTION WERE CONDUCTED LESS FREQUENTLY

Industry respondents only file the FERC-546 data when rates for new or changed transportation and storage services will be needed for new or modified natural gas infrastructure. It is not possible for the Commission to receive FERC-546 data less frequently and meet its statutory responsibility of ensuring that the rates of these natural gas pipelines are just and reasonable under the Natural Gas Act.

7. EXPLAIN ANY SPECIAL CIRCUMSTANCES RELATING TO THE INFORMATION

There are no special circumstances related to this collection.

8. DESCRIBE EFFORTS TO CONSULT OUTSIDE THE AGENCY: SUMMARIZE PUBLIC COMMENTS AND THE AGENCY'S RESPONSE TO THESE COMMENTS

In accordance with OMB requirements⁵, the Commission published a 60-day notice⁶ and a 30-day notice⁷ to the public regarding this information collection on 12/3/2024 and 3/5/2025 respectively. Within the public notice, the Commission noted that it would be requesting a three-year extension of the public reporting burden with no change to the existing requirements concerning the collection of data. No comments were received in response to the 60-day notice.

⁵ 5 CFR 1320.8(d)

⁶ 89 FR 95765

⁷ 90 FR 11310

9. EXPLAIN ANY PAYMENT OR GIFTS TO RESPONDENTS

There are no payments or gifts to FERC-546 respondents.

10. DESCRIBE ANY ASSURANCE OF CONFIDENTIALITY PROVIDED TO RESPONDENTS

The Commission does not consider the information collected in FERC-546 filings to be confidential. However, the filer may request privileged treatment of a filing that may contain information harmful to the competitive posture of the applicant if released to the general public.⁸

11. PROVIDE ADDITIONAL JUSTIFICATION FOR ANY QUESTIONS OF A SENSITIVE NATURE, SUCH AS SEXUAL BEHAVIOR AND ATTITUDES, RELIGIOUS BELIEFS, AND OTHER MATTERS THAT ARE COMMONLY CONSIDERED PRIVATE

The Commission does not consider any of the questions to be sensitive or private.

12. ESTIMATED BURDEN OF COLLECTION OF INFORMATION

FERC-546 (Certificated Rate Filings: Gas Pipeline Rates)						
	Annual Numbe r of Respon dents (1)	Annual Number of Response s per Respond ent (2)	Total Number of Response s (rounded) (1)*(2)=(3)	Average Burden & Cost Per Respons e (rounde d) (4)	Total Annual Burden Hours & Total Annual Cost (rounded) (3)*(4)=(5)	Cost per Responde nt (\$) (rounded) (5)÷(1)
Pipeline Certificat e Filings and Storage Applicati ons	48	111	48	500 hrs.; \$50,000	24,000 hrs.; \$2,400,000	\$50,000
Project Area Labor Wage ¹²	16	1	16	15 hrs; \$1,500	240 hrs; \$24,000	15 hrs: \$1,500

The Commission estimates the public reporting burden⁹ and cost¹⁰ for this information collection as:

¹⁰ Commission staff estimates that the industry's skill set and cost (for wages and benefits) are approximately the same as the Commission's average cost. The FERC 2024 average salary plus benefits for one FERC full-time equivalent (FTE) is \$207,786/year (or \$100/hour).

¹¹ This figure was calculated by dividing the total number of responses (111) by the total number of respondents (83). The resulting figure was then rounded to the nearest thousandth place.

¹² Project-Area Wage Standards in the Labor Cost Component of Cost-of-Service Rates under Docket No. PL24-1-000 was issued on March 21, 2024, which allows jurisdictional entities to include wages consistent with project-area standards in cost-ofservice rates filed with the Commission where the record supports that outcome.

⁹ "Burden" is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to Title 5 Code of Federal Regulations 1320.3.

Totals	64	64	515 hrs.	24,240 hrs.	
			\$51,500	\$2,424,000	

13. ESTIMATE OF TOTAL ANNUAL COST OF BURDEN TO RESPONDENTS

There are no non-labor start-up costs. All costs are related to burden hours and are addressed in Questions #12 and #15.

14. ESTIMATED ANNUALIZED COST TO FEDERAL GOVERNMENT

	Number of Employees (FTEs)	Estimated Annual Federal Cost
PRA ¹³ Administration	-	\$8,396
Cost ¹⁴		
Data Processing and Analysis ¹⁵	0.75	\$ 155,839.50
FERC Total		\$ 164,235.50

The Commission bases its estimate of the "Data Processing and Analysis" cost to the Federal Government on salaries and benefits for professional and clerical support. This estimated cost represents staff analysis, decision making, and review of any actual filings made in response to the information collection.

15. REASONS FOR CHANGES IN BURDEN INCLUDING THE NEED FOR ANY INCREASE

The annual burden hours decreased from 37,483 to 24,000 due to better accuracy in the estimate and there was a small increase in the number of respondents from 47 to 48 from the last renewal. The annual number of tariff and rate filings submitted by a respondent and received at the Commission will fluctuate from year to year due to the business requirements and needs of the industry. However, the Commission made no program changes regarding burden imposed upon respondents and the FERC-546 requirements remain unchanged from previously approved clearance packages.

¹³ Paperwork Reduction Act of 1995 (PRA).

¹⁴ The PRA Administration Cost is \$8,396 and includes preparing supporting statements, notices, and other activities associated with Paperwork Reduction Act compliance.

¹⁵ The FERC 2024 average salary plus benefits for one FERC full-time equivalent (FTE) is \$207,786/year (or \$100/hour).

The following table shows the total burden of the new collection of information. The format, labels, and definitions of the table follow the ROCIS submission system's "Information Collection Request Summary of Burden" for the metadata.

FERC-546	Total Request	Previously Approved	Change due to Adjustment in Estimate	Change Due to Agency Discretion
Annual Number of Responses	48	91	-27	0
Annual Time Burden (Hr)	24,000	37,723	-13,483	0
Annual Cost Burden (\$)	0	0	0	0

The format, labels, and definitions of the table above follow the ROCIS system's "ICR Summary of Burden" for the meta-data.

16. TIME SCHEDULE FOR PUBLICATION OF DATA

There are no tabulating, statistical, tabulating analysis, or publication plans for the collection of information. The data are used for regulatory purposes only.

17. DISPLAY OF EXPIRATION DATE

The expiration date is displayed in a table posted on ferc.gov at <u>https://www.ferc.gov/information-collections.</u>

18. EXCEPTIONS TO THE CERTIFICATION STATEMENT

There are no exceptions.
