### **Experience with ADAS/ADS**

Advanced driver assistance systems and automated driving systems (ADAS/ADS) are safety systems that assist the driver by providing stationary object alerts, steering control, lane departure warnings, automatic braking, and/or a variety of other methods. Some common ADAS/ADS technologies include automatic emergency braking (AEB), lane centering assist (LCA), lane keep assist (LKA), forward collision warning (FCW), lane departure warning (LDW), adaptive cruise control (ACC), and blind spot warning (BSW). Please answer the following questions **based on your opinions and any past experiences with ADAS/ADS technology**. To answer, **check only one box** for each statement that best expresses your answer (unless indicated otherwise).

13. Indicate which of the following ADAS technologies you have **heard of** (select all that apply)

- Automated parking
- Remote-control drive or remote-control parking
- Traffic jam assist
- Adaptive cruise control
- Forward collision warning system
- Automatic emergency braking
- Blind spot warning
- Camera-mirror system
- Lane-keep assist
- Lane centering assist
- Lane departure warning
- Traffic sign recognition system
- Pedestrian detection

- Rear backing camera
14. Indicate which of the following ADAS technologies you have **used in your personal or commercial vehicle**. Please check all that apply.
- Automated parking
  - Remote-control drive or remote-control parking
  - Traffic jam assist
  - Adaptive cruise control
  - Forward collision warning system
  - Automatic emergency braking
  - Blind spot warning
  - Camera-mirror system
  - Lane-keep assist
  - Lane centering assist
  - Lane departure warning
  - Traffic sign recognition system
  - Pedestrian detection
  - Rear backing camera

15. For each of the technologies **you indicated using above**, indicate whether you have experienced a situation in which this technology worked to **prevent a crash**.
