

**Request for OMB Approval for Non-Substantive Revisions to the Forms  
Relating to FDIC Acquisition Services Information Collection (OMB  
Control No. 3064-0072)**

**Forms:** Contractor Representations and Certifications (FDIC Form No. 3700-04a); and Integrity and Fitness Representations and Certifications (FDIC Form 3700-12)

**Justification:** The FDIC is revising two forms relating to its Acquisition Services Program. The revisions are non-substantive inasmuch as the added provisions are not considered information collections pursuant to 5 CFR 1320.3(h) as they are all certifications. These provisions are being included in forms that have been cleared by OMB as a matter of efficiency to keep all certifications related to legal services contracting together. The addition of these certifications does not change the estimated time per response for these forms. There are no substantive changes to the forms which continue to collect the same information currently approved by OMB.
