Key Terms

Term	Prefix / format	Definition
Calculated variable	CALC_	Variables calculated by the CAPI program that appear in the CRQ. Item identifiers for CAPI calculated variables start with the prefix CALC_ followed by the variable name.
Century Month	_C	A century month is an integer value that represents the number of months since January 1900. These calculations are used to compare dates and facilitate routing where respondents are asked to only provide the month and year in which an event took place. These types of questions occur in every date item within the CRQ, with the exception of DOB (E51). As an example, January 2014 is represented by the integer 1369. The higher the integer, the closer the event is to the current date, and the lower the integer, the farther it is in the past. Names of variables collecting century month end in the suffix _C.

Term	Prefix / format	Definition
Fill text		Text to be displayed for which wording depends on prior responses or other conditions. Square brackets enclose the conditions, description of or actual text to be filled, and if applicable, instructions for how the fill text should be displayed. Actual text to be filled is enclosed in quotes e.g., [if condition is true, fill with "text"]. Fill text based on a prior response or CRQ calculated variable refers to the item number or variable name, respectively, e.g., [fill with # of male partners (SX19)], [fill with current questionnaire year (QYR)]. Examples: [fill with interview month, formatted as text].
Filter question		A question that determines whether the respondent should receive subsequent question or set of questions, typically on a related topic.
Hard Edit Check	HardEdit_	A check to determine whether the response entered is logically inconsistent with specific previously entered response. If so, CAPI program displays message to interviewer. Hard edit checks cannot be suppressed, i.e., program will <u>not</u> advance until interviewer has changed at least one of the inconsistent values.
Information for interviewer	INFO_	Items for which the CAPI screen displays Information for the interviewer that is <u>NOT</u> read to the Respondent.
Interviewer instruction		Instruction to interviewer regarding administration of a particular question. These instructions are displayed within brackets on the same CAPI screen as the question. Standard instructions are 'Give Respondent Flashcard {letter}', 'READ choices', 'DO NOT read choices', & 'CHECK ALL that apply.' Instructions for flashcards should appear above the question text; instructions for response options should appear below the question text.
Introductory statement	INTRO_	Transitional statement or definition read to R at the beginning of a new topic (e.g., Section, set of questions, etc.). Displayed on a separate CAPI screen before the item. Item IDs for introductory statements start with the prefix INTRO_ followed by section abbreviation, series, or the item ID of the first item in set or only item to which it applies.
Item		Elements of the CRQ, including but not limited to questions, screens that display text but do not collect data (e.g., messages and other information for the interviewer, introductory statements read to R), calculated variables, etc.
Item identifier		Identifier for all items in the CRQ. Most items in the NHBS CRQ are questions (including items for which the interviewer enters a response even if the text is not explicitly a question, e.g., survey ID#). Item IDs for questions begin with the 2-digit section abbreviation, followed by a number. Question numbers are in ascending order within each section. Some question numbers end in a letter (indicating it is part of a set). Items that are not questions, e.g., calculated variables refer to the variable name. Item IDs for logic checks refer to the next item. Item IDs for hard and soft edits refer to the preceding item.
Logic Check	Check_	Logic that must be checked in the CAPI program in order to determine proper routing to the next item, topic, or section in the CRQ.

Term	Prefix / format	Definition
Message	INTERVIEWER:	Message displayed to the interviewer that is <u>not</u> to be read to R. May be triggered by an edit check. Distinct from Interviewer Instruction.
Question		Any item for which the interviewer enters a response, including questions asked of R, questions asked of the interviewer, and other codes.
Range		Range of valid response values for items collecting or computing numeric data. E.g., the valid range of responses to number of sex partners in past 12 months is 0 to 7000.
Section		Section of the NHBS CRQ. Each section has a unique two letter abbreviation.
Series	...Series.	A group of questions on a given topic that share a general universe. Most but not all series have a parallel series elsewhere (e.g. Male-Female, Male-Male, and Female-Male series).
Soft Edit Check	SoftEdit_	A check to determine whether the response entered is implausible or otherwise requires interviewer's attention. If so, CAPI program displays message to interviewer. The CAPI program allows the interviewer to proceed to the next screen,, even if they do not go back and change the response to 1 or more items that triggered the message.
Universe	Universe_	A specific group of respondents to receive a section, series, question, etc. E.g., the universe for the Consent Section is respondents who were eligible for the cycle in which they completed the eligibility screener. Universe statements are included in the CRQ to facilitate understanding by project area staff, Institutional Review Boards, etc. Universe statements are not intended to be used for CAPI programming.
Variable		Variables computed in the CAPI program or otherwise collected in the CAPI program.

CAPI programming conventions

- Below are conventions to be used for CAPI programming: Unless otherwise specified in the CRQ, all items that collect data require a response to be entered before advancing to the next item.
- DK, REF, & NA options are codable options in CAPI as listed in the CRQ.
- The CAPI program advances in the order specified in the CRQ. Interviewers may return to previous screens but cannot choose to skip or change the order of items, topics, sections, etc.
- Text displayed on CAPI screens appears as it is formatted (e.g., bold, capitalization, etc.).
- Calculated variables used solely for CAPI programming (e.g., to facilitate logic or fill text) are not included in the CRQ.
- Items requesting dates.
 - o For items requesting full date (year, month, and day) the CAPI program should require all 3 fields to be completed if any are entered. If 1 component of the
 - o For items requesting month & year, allow an unknown month, even
