Table A: Description of Changes (optional, helpful if multiple changes to multiple forms):	Type of Change	Question/Item	Requested Change
List of MDN for Case Data (Link)	Question Revision	Sex (Description: Documentation of a specific instance of sex and/or gender information, from any data source)	Change data element description to “Person’s sex.” Change value set from Male/Female/Non-binary/Unknown (PHVS Sex NNDSS) to Male/Female/Unknown (PHVS Sex MFU) to remove the concept of ‘Non-binary’. Justification: This value set of Male/Female/Unknown is the same as the value set that is used for the National Notifiable Diseases Surveillance System (NNDSS), OMB # 0920-0728. For both data collections (NNDSS and MDN) CDC is a

			secondary data collector. The program would like to leave the third option (Unknown) because further changes would require informing state partners about the change and making multiple system updates across both CDC and STLTs. [Unknown is used to indicate no response was provided. The term gender (or other versions of gender) is not used.]
List of MDN for Case Data (Link)	Question Deletion	Gender Identity (Description: Person-identified gender identity (i.e., an individual's personal sense of being a man, woman, or another gender, regardless of the sex that person was assigned at birth))	Remove data element.
List of MDN for Case Data (Link)	Question Deletion	Other Gender Identity Text (Description: If "Other" specified for gender identity, specify value here.)	Remove data element.
