Information Collection Requirement

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Type of Request: Extension.

OMB Control Number: 1652–0058.

Form(s): NA.

Affected Public: Individuals, Households, Businesses, Organizations, and State, Local or Tribal Governments.

Abstract: The information collection activity provides a means to gather qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Executive Order 12862 commitment to improving service delivery.

This collection will allow for ongoing, collaborative, and actionable communications between TSA and its customers and stakeholders. TSA believes qualitative feedback from customers and stakeholders provides useful insights on their perceptions, experiences, opinions, and expectations regarding TSA products or services, provides TSA with an early warning of issues with service, and focuses attention on areas where changes regarding communication, training, or operations might improve delivery of products or services.

The solicitation of feedback will target areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered by TSA. If this information is not collected, vital feedback from customers and stakeholders on TSA’s services will be unavailable.

As a general matter, this information collection will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature. Information gathered is intended to be used solely within TSA general service improvement and program management purposes and is not intended for release outside of TSA (if released, TSA will indicate the qualitative nature of the information). Feedback collected under this generic clearance provides useful qualitative information, but it does not yield data that can be generalized to the overall population. Qualitative information is not designed or expected to yield statistically reliable or actionable results; it will not be used for quantitative information collections. Depending on the degree of influence the results are likely to have, there may be future information collection submissions for other generic mechanisms that are designed to yield quantitative results.

Below we provide TSA’s projected average estimates for the next 3 years:

Estimated Number of Annual Respondents: 7,094,500.

Estimated Annual Burden Hours: 1,180,050.

Dated: June 30, 2025 .
